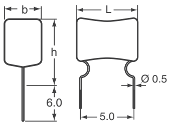
Mini-Blue Series MKT — In Heat-Shrinkable Tube



The EPCOS Mini-Blue Capacitor series can be used in a multitude of general purpose applications such as DSL, Energy Saving Lamps, Compact Fluorescent Lamps, Consumer Electronics and Alarm Systems (including motion sensors and break in/smoke/fire alarms). An advantage of the EPCOS Mini-Blue Capacitors is the small size where board space is limited, taking up considerably less board space than a boxed capacitor with the same voltage/capacitance ratings. The Mini-Blue's unique stacked construction give it the ability to withstand high pulse strength (High DV/DT).

Construction: • Dielectric: Polyethylene terephthalate (polyester) • Stacked-film technology • 5mm lead spacing • Heat shrinkable tube: polyester (100µm, 125°C) **Terminals**: • Parallel wire leads - tinned **Features**: • Very small dimensions • Self-healing properties • High pulse strength **Specifications**: • Operating temperature range: -55°C ~ 125°C • Climatic category: 55/125/56

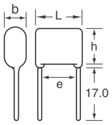
MKT — Epoxy Resin Coating



Construction: • Dielectric: Polyethylene terephthalate (polyester, PET) • Epoxy resin coating (UL 94 V-0)
Terminals: • Straight wire leads, lead free tinned, lead length 17mm
Features: • High pulse strength • High contact reliability
Specifications: • Maximum Operating Temperature: 125°C • Climatic category (IEC 60068-1): 55/100/56
Typical Applications: • Compact fluorescent lamps (CFL) • Generators

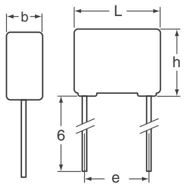
CombiSuppressor — PET Film Capacitor with Integrated Varistor



Features: With the CombiSuppressor series, Epcos has developed an innovative solution for EMI suppression in DC motors in motor vehicles. The CombiSuppressor comprises a film capacitor and a multilayer ceramic varistor connected in parallel in a plastic case. This packaging technology offers mechanical protection for the components and facilitates automatic picking and placement.
Construction: • Dielectric: Metallized polyethylene teraphthalate • Stacked-film capacitor technology • Plastic case (UL 94V-0) • Epoxy resin sealing • SIOV metal oxide varistor
Specifications: • Operating Temperature Range: -55°C ~ 125°C, Meets ISO 7631 • Climatic category (IEC 60068-1): 55/125/56

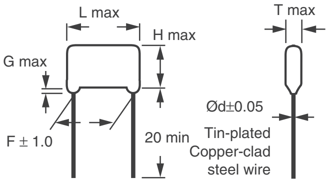
Panasonic® ECQ-E(B) Series Miniaturized Metallized Polyester Film Capacitors



The type ECQ-E(B) series is a downsized version of the popular ECQ-E(F) series. It provides similar electrical characteristics in a smaller package.

Features:

• Noninductive construction • Wound metallized polyester dielectric

Applications:

• Blocking, bypassing, filtering, timing, interference suppression and low pulse applications

Specifications:

• Operating temperature range: -40°C ~ 85°C • Rated voltage: 250VDC • Capacitance tolerance: ±10%(K) @ 1kHZ • Dissipation factor: ≤1.0% (20°C 1kHz) • Withstand voltage: 250VDC X 150% for 60 seconds between terminals • Insulation resistance: ≥9,000MΩ (C ≤ 0.33μF) @ 100VDC, 20°C for 60 seconds; ≥3,000MΩ (C > 0.33μF) @ 100VDC, 20°C for 60 seconds

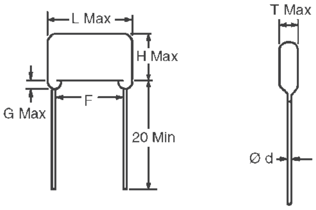
Panasonic® ECQ-E(F) Series

Miniaturized Metallized Polyester Film Capacitors



The type ECQ-E(F) series uses a dual side metallized polyester film with high dielectric constant(e) which makes it possible to produce large C-values in small dimensions and is an economical capacitor meeting high requirements for professional circuit design.

Features: • Self-healing property • Flame retardant epoxy resin coating

Applications: • Blocking • Bypassing • Filtering • Timing • Interference suppression • Low pulse applications

Specifications: • Reference standard: JIS C5115, C5151 • Operating temperature range: -40°C ~ 85°C (105°C, 75% of Rated voltage) • Rated voltage: 100V, 250V, 400V, 630V • Capacitance tolerance: ±10% (K) • Dissipation factor: 1.0% max. (20°C 1kHz) • Withstand voltage: Rated voltage DC100V ~ 630V (VDC) X 150% 1 minute between terminals • Insulation resistance: DC100V ~ 630V: C ≤ 0.33μF 9,000MΩ min., C > 0.33μF 3,000ΩVμF min.

Panasonic ECQ-E(H) Series Metallized Polyester Film Capacitors

The ECQ-E(H) series has a non-inductive construction using a metallized Polyester film with a flame retardant epoxy resin coating for an active filter.

Features: • Smaller size • Self-healing property • Excellent electrical characteristics • Flame retardant epoxy resin coating

Application: Active filter circuit

Specifications: • Operating Temperature Range: -40°C ~ 105°C • Rated Voltage: 450VDC (Derating of rated voltage by 1.25%/°C at more than 85°C) • Capacitance Tolerance: ±10% • Dissipation Factor (tanδ): tanδ ≤ 1.0% (20°C, 1kHz) • Withstand Voltage: Between terminals: Rated (450VDC) X 150% 60 seconds. Between terminal to enclosure: Rated voltage (450VDC) X 200% 1 second to 5 seconds • Insulation Resistance (IR): IR ≥ 3000 MΩ (20°C, 100VDC, 60 seconds)

NEW! XK Series Metallized Polyester Film Capacitor

The XK Series capacitors are: • Highly reliable and have superior performance at high frequency applications, self-healing and non-inductive construction, using a dielectric made of polyethylene terephthalate film covered with vacuum-evaporated metal • Large capacitance in small dimensions • Finished by inner dipping with liquid epoxy resin and outer coating with flame-retardant epoxy resin, which provides excellent humidity resistance • Designed 1mm maximum of epoxy on lead wire for best performance at soldering process on P.C. board assemblies

Applications: General electronic and communications equipment

Specifications: • Temperature Range: -40 to 105° C • Rated Voltage: 250, 400, 630VDC • Capacitance Tolerance: ±5% (J), ±10% (K) • Insulation Resistance: C ≤ 0.33μF : 9000 MΩ or more, C > 0.33μF : 3000 ΩF or more • Withstand Voltage: Between Terminals - Rated Voltage x 175%, 1 to 5 seconds / Between Terminal and Coverage - Rated Voltage x 200%, 1 to 5 seconds • Encapsulation: Flame retardant epoxy resin

NEW! XT Series Metallized Polypropylene Film Capacitor

The XT Series capacitors are: • Ideal for high frequency applications due to a metallized polypropylene film dielectric which exhibits superior operative characteristics with minimal loss at high frequency • Electrode has minimal inductance because of non-inductive construction • Finished by inner dipping with liquid epoxy resin and outer coating with flame-retardant epoxy resin, which gives superior characteristics against moisture

Applications: High frequency and large current circuit applications

Specifications: • Temperature Range: -40 to 105°C • Rated Voltage: 400VDC and 630VDC • Capacitance Tolerance: ±10% (K) • Insulation Resistance: C ≤ 0.33μF 30000 MΩ or more, C > 0.33μF 10000 ΩF or more • Withstand Voltage: Between Terminals - Rated voltage x 175% and 200%, 1 to 5 seconds • Encapsulation: Flame retardant epoxy resin

NEW! YX Foil Polyester Film Capacitor

The YX Series film capacitors are: • Inductive constructed, using a dielectric of polyester film together with aluminum foil • Coated with epoxy resin for superior heat resistance, humidity resistance and solvent resistance • Suited for use in commercial and industrial applications • Available for automatic insertion systems

Specifications:

• Temperature: -40 to 85°C • Rated Voltage: 50VDC and 100VDC • Capacitance Tolerance: ±5% (J) and ±10% (K) • Insulation Resistance: 30,000 MΩ or more • Withstand Voltage: Between Terminals - Rated Voltage x 250%, 1 to 5 seconds / Between Terminals and Coverage - Rated Voltage x 200%, 1 to 5 seconds

NEW! XK-(ZH) Metallized Polyester Film Capacitor

The XK Series film capacitors are: • Highly reliable and superior performance in high frequency applications, self-healing and non-inductive construction, using a dielectric made of polyethylene terephthalate film covered with vacuum-evaporated metal • Finished by inner dipping with liquid epoxy resin and outer coating with flame-retardant epoxy resin, which provides excellent humidity resistance • Designed to be compact and to cover larger capacitance range having advantage of tolerating to A.C. voltage and large current flow • Designed 1mm maximum of epoxy on lead wire for best performance at soldering process on P.C. board assemblies

Applications: Filtering, DC-blocking , coupling AC circuits for motor starting, charging / discharging, lighting, and noise suppression

Specifications: • Temperature: -40 to 105°C (Rated temperature : 85°C) • Rated Voltage: 250, 400, and 630VDC • Capacitance Tolerance: ±5% (J) and ±10% (K) • Insulation Resistance: C ≤ 0.33µF : 9000 MΩ or more, C > 0.33µF : 3000 ΩF or more • Withstand Voltage: Between Terminals - Rated Voltage x 175%, 1 to 5 seconds / Between Terminals and Coverage - Rated Voltage x 200%, 1 to 5 seconds • Encapsulation: Flame-retardant epoxy resin

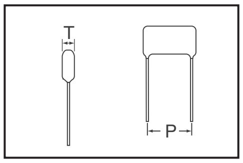
nichicon *NEW!* Plastic Film Capacitors

XL Series
Metallized Polyester Film Capacitors



The XL Series capacitors are: • Highly reliable and superior in high frequency applications, self-healing and non-inductive construction, using a dielectric of metallized polyester film • Finished by inner dipping, with liquid epoxy resin and outer coating with flame-retardant epoxy resin, those double coatings provide excellent humidity resistance • Designed in a small and compact size but yet with higher capacitance for high density mounting

Specifications:

• Temperature Range: -40 ~ 105°C • Rated Voltage: 125VAC and 250VAC • Capacitance Tolerance: ±10% (K) • Insulation Resistance: C ≤ 0.47μF : 2000 MΩ or more, C > 0.47μF : 1000 ΩF or more • Encapsulation: Flame retardant epoxy resin

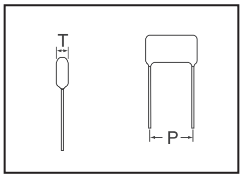
XP Series
Metallized Polypropylene Film Capacitors



The XP Series capacitors are: • Ideal for high frequency applications due to a metallized polypropylene film dielectric which exhibits superior operative characteristics with minimal loss at high frequency • Self-healing electrode and non-inductive construction provides excellent characteristics in minimal inductance having better with standing voltage capability • Finished by inner dipping with liquid epoxy resin and outer coating with flame-retardant epoxy resin, those double coating gives superior characteristics against moisture

Applications: High frequency circuits, general electronic circuits and etc.

Specifications: • Temperature Range: -40 ~ 105°C • Rated Voltage: 250, 400, 630, 800VDC • Capacitance Tolerance: ±5% (J), ±10% (K) • Insulation Resistance: C ≤ 0.33μF : 30000 MΩ or more, C > 0.33μF : 10000 ΩF or more • Withstand Voltage: Between Terminals - Rated Voltage x 175%, 1 to 5 seconds, Between Terminal and Coverage - Rated Voltage x 200%, 1 to 5 seconds • Encapsulation: Flame retardant epoxy resin

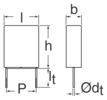
VISHAY. BCcomponents

Metallized Polyester Film Capacitors

MKT 370 and MKT 373 Series



FEATURES: • Low-inductive wound cell of metallized (PETP) film • Potted with epoxy resin in a flame-retardant case • Radial leads of solder-coated wire • Withstands solvents and rinsing liquids • Small stand-off pips to allow removal of solder flux • Suitable for high density packaging **APPLICATIONS:** • Blocking and coupling • Bypass and energy reservoir **SPECIFICATIONS: Rated Temperature:** 85°C **Maximum Application Temperature:** 105°C

Panasonic®

PPS Film Capacitors - ECHS

Non-inductive construction using PPS film as designed for high heat resistance and high frequency applications.

Features: • Wide operating temperature range -40°C ~ 125°C • Excellent temperature coefficient -100PPM/°C • Excellent frequency characteristics

Applications: • Automotive • Oscillation circuits

Electrical Specifications: • Temperature Range: -40°C ~ 125°C • Rated Voltage: 50V DC, 100VDC • Capacitance Range: 0.0001 to 0.47µF • Capacitance Tolerance: ±2%(G) and ±5%(J) • Dissipation Factor: 0.3% maximum at 1kHz and 20°C • Withstand Voltage: 1 ~ 5 seconds at 250% of rated voltage between terminals • Insulation Resistance: 45,000MΩ minimum, for values equal to or less than .33µF. 15,000 MΩ minimum, for greater than .33µF (20°C, 100VDC, 60s)

Panasonic®

Metallized Polyester/Polypropylene Film Capacitors

ECHAX Type – Equipped with a Safety Mechanism

Features:
- Non-inductive construction • Excellent safety characteristics • Flame-retardant epoxy resin dipped enclosure • Small and compact

Application:
- Motor running • Fluorescent lamp ballast

Electrical Specifications:
- Temperature Range: -25°C ~ 70°C • Rated Voltage: 180, 220 and 250VAC • Capacitance Range: 1.0 to 6.0µF • Capacitance Tolerance: ±5%(J) • Dissipation Factor: 0.4% maximum at 50/60Hz and 20°C
- Withstand Voltage: Between Terminals; VAC (rated voltage) x 175% 60s. Between Terminals to Enclosure; 2000VAC 60s
- Insulation Resistance: Between Terminals; 1000Ω Fmin. (20°C 100VDC 60s). Between Terminals to Enclosure; 1000MΩ minimum (20°C 500 VDC 60s)

ECW-U(X) Series

Specifications: • Operating Temperature: -55°C ~ 105°C • Rated Voltage: 100VDC • Withstanding Voltage Between Terminals: Rated Voltage x 175% 1 to 5s • Dissipation Factor: ≤1.0% (20°C, 1kHz) • Insulation Resistance: ≥3000MΩ (20°C, 100VDC 60s) • Reflow Soldering Conditions: 240°C maximum and 30 seconds maximum at more than 210°C (temperature at cap surface)

Case Size	WV DC	Cap. µF	Dim. H (mm)	Digi-Key Part No.	Cut Tape Pricing			Tape and Reel‡		Panasonic Part No.

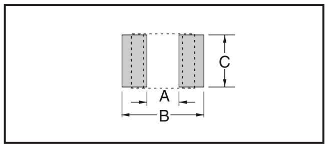
Panasonic® SMT Capacitors ECP-U (SF Submicron)

RoHS COMPLIANT

Digi-Reel®



FEATURES: • Small in size • Low ESR • Excellent sound quality

APPLICATIONS: • Coupling • Decoupling • Noise Reduction

SPECIFICATIONS: • Operating Temperature: -40°C ~ 85°C • Dissipation Factor: 1.5% maximum (20°C, 1kHz) • Withstand Voltage: Between terminals rated voltage (VDC) x 175%, 1 to 5s • Insulation Resistance: C≤0.33µF: 1000MΩ minimum (20°C, 16VDC, 60s), C>0.33µF: 300MΩ minimum (20°C, 16VDC, 60s) • Soldering Reflow Conditions: 240°C maximum and 30 seconds maximum at more than 210°C (temperature at cap surface)

Note: Solder paste/flux shall have less than 0.1wt% halogen content.

Storage: The unpacked products shall be kept in polyethylene bag together with well-dried silica-gel (from 5g to 10g) or be kept in storage at a temperature of 25°C, with a humidity less than 50% RH. This capacitor shall be used in only reflow method. Don't use in flow, dipping, or VPS soldering method.

A recommended solder paste thickness is between 0.10 (mm) and 0.15 (mm).

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic® M-Series Polyester and Foil Capacitors

Features:
High insulation resistance. Non-inductive construction: with tinned copper leads welded to the foils. High peak current capability. Solvent-resistant resin coated body.

Applications:
Blocking, by-pass and coupling of D.C. and signals to VHF range. Pulse, logic and timing circuits. Light-duty pulse forming networks. Filter and noise suppression circuits. General purpose usage.

Specifications
• Reference standard: JIS C5113 Characteristic M. • Operating Temperature Range: -40°C ~ 85°C • Construction: Polyester film, non-inductive, phenolic/epoxy resin coating, wax impregnation.

Electrical Specifications:
• Capacitance Tolerance: ±10% (K). Insulation Resistance: > 10,000mΩ. • Dissipation Factor: < 1.0% @ 1KHZ. • Dielectric Withstanding Voltage: 250% of rated voltage for 5 seconds. • Operating Temperature: -40°C ~ 80°C.

Panasonic® Metallized Polyester Capacitors – ECQE(C) Type

RoHS COMPLIANT

Features:
• Box-type construction (case meets UL94V-0 flame classification, meets requirements of IEC950) • Operating Temperature Range: -25°C ~ 85°C (105°C*) (*Requires voltage, current and pulse current derating) Application: • Interference suppressor for active circuits

Electrical Specifications:
• Rated Voltage: 450VDC • Capacitance Tolerance: ±10% • Withstand Voltage: Between Terminals: 1 minute @ 150% of rated voltage (The capacitor shall be applied the voltage through a resistor of 2kµ or more when charged and discharged.) Between Terminals connected together and case: 1 ~ 5 seconds @ 200% of rated voltage • Insulation Resistance Between Terminals: 9,000MΩ or more (when C≥0.33µF) 3,000MΩ/µF or more (when C>0.33µF) @ 100VDC ±15V for 60 ±5 seconds, @ 20°C • Dissipation Factor: 1.0% or less (measured at a frequency of 1 ±0.2kHz, at 20°C)

Panasonic® Polypropylene Film Capacitors — P Series

Features: • Wide capacitance range • Close capacitance tolerance • High insulation resistance • Low dissipation factor • Non-inductive construction • Epoxy resin coating **Applications:** • Blocking, by-pass and coupling of DC and signal to UHF range • Pulse, logic and timing circuit • Light duty pulse forming network • Filter and noise suppression circuit **Electrical Specifications:** • Reference Standard: EIAJ RC-3670A • Temperature Range: -40°C ~ 85°C • Dissipation Factor: .1% maximum @ 1KHz and 25°C • Withstand Voltage: 1-5 seconds @ 250% of rated voltage • Insulation Resistance: 45,000MΩ minimum, for values less than .33µF. 15,000 MΩ/µF minimum, for .33µF and greater. (Measured after a 2-minute charge at rated voltage and 25°C)

Panasonic® Polypropylene Film Capacitors Series *(Cont.)*

ECQ-P (Z) Series

Non-inductive construction using Polypropylene film with epoxy resin coating.

Features: • Excellent temperature and frequency characteristics • Excellent long term stability **Applications:** • Dolby circuits • Oscillation circuits **Electrical Specifications:** • Temperature Range: -40°C ~ 85°C • Rated Voltage: 50VDC, (Voltage derating is required above 70°. See data sheet for details.) • Dissipation Factor: 0.1% maximum @ 1kHz and 20°C • Withstand Voltage: Between terminals: Rated voltage: (VDC) x 250% 1-5 seconds • Insulation Resistance: C ≤ 0.33µF: 45000MΩ minimum C > 0.33µF: 15000MΩ µF minimum (20°C Rated Voltage - 60s)

.0075 ~ .47 µF .0001 ~ .0068 µF

Panasonic® Metallized Polypropylene Film Capacitors – ECWF(A) Series

Features: • Small size • Excellent frequency characteristics • Low loss • Low Hum Sound Noise

Applications: • 250VDC: High current and high frequency • 450VDC: Active filter circuits

Electrical Specifications: • Temperature Range: -40°C ~ 105°C • Withstand Voltage: Between terminals: Rated voltage (VDC) x 150% for 60s • Dissipation Factor: 0.1% maximum (20°C, 1kHz) • Insulation Resistance: 250VDC: 9,000 MΩ minimum for values equal to or less than 0.33µF and 3,000 MΩ/µF minimum for values greater than 0.33µF (20°C, 100VDC, 60s) 450VDC: 30,000 MΩ minimum for values equal to or less than 0.33µF and 10,000 MΩ/µF minimum for values greater than 0.33µF (20°C, 100VDC, 60s)

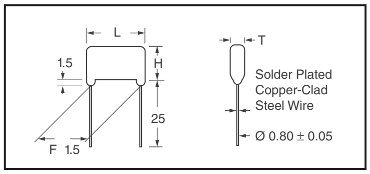
Panasonic Metallized Polypropylene Film Capacitors *(Cont.)*

ECWF(B) Series



Designed for applications where high current and high frequency are required.
Features: • Low-loss • Excellent frequency characteristics • Flame retardant epoxy resin coating
Applications: • High frequency and high current circuits (TV, display, monitor, power supply, etc.) **Electrical Specifications:** • Temperature Range: -25°C ~ 85°C • Rated Voltage: 250VDC (150Vrms, 250Vp-p), 400VDC (200Vrms, 400Vp-p) • Dissipation Factor: .068µF ~ .51µF: 0.05% maximum (20°C, 1kHz) 250VDC, .56µF ~ 4.7µF: 0.1% maximum (20°C, 1kHz) 250VDC, .068µF ~ 4.7µF: 0.2% maximum (20°C, 10kHz) 250VDC, .068µF ~ 1.5µF: 0.1% maximum (20°C, 1kHz) 400VDC • Withstand Voltage: Between terminals • Rated voltage: (VDC) x 150% for 60s • Insulation Resistance: 9,000MΩ minimum, for values 0.068µF ~ .33µF, 3,000 MΩ/µF minimum, for 0.36µF ~ 4.7µF (20°C, 100VDC, 60s)

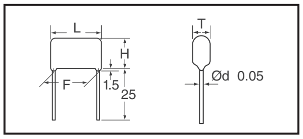
ECWF(L) Series



Non-inductive construction using Polypropylene film with flame retardant epoxy resin coating.

Features: • Miniaturized **Recommended Applications:** • Lighting • Power supply • Industrial use • Suitable for high current and high frequency circuits **Electrical Specifications:** • Temperature Range: -40°C ~ 85°C (105°C) • Rated Voltage: 400VDC, 630VDC • Lead Material: 400V: 0.022µF ~ 0.11µF Tin-plated, Copper-clad, Steel-wire; 0.12µF ~ 2.4µF Tin-plated, Copper-wire 630V: 0.01µF ~ 0.043µF Tin-plated, Copper-clad, Steel-wire; 0.047µF ~ 1.3µF Tin-plated, Copper-wire • Capacitance Tolerance: ±3% (H), ±5% (J) • Withstanding Voltage: Rated voltage x 150% for 60s • Insulation Resistance: 9,000MΩ minimum, for values equal to or less than .33µF. 3,000MΩ/µF minimum, for greater than .33µF (20°C, 100VDC and 500VDC, 60s) • Dissipation Factor: 0.05% maximum at 1kHz and 20°C.

◆ ***RoHS Compliant***

NEW! ECWH(A) Series

Designed for high frequency and high current applications.

Features:

• Small size • Low-loss • Excellent frequency characteristics • Low Hum Sound Noise

Recommended Applications: • Resonance circuit for power supply

Electrical Specifications:

• Temperature Range: -40°C ~ 105°C • Rated Voltage: 800VDC • Capacitance Tolerance: ±3% • Dissipation Factor: 0.1% or less at 1kHz • Withstand Voltage: Between terminals - Rated voltage (VDC) x 150% for 60s • Insulation Resistance: 30,000 MΩ minimum, at 500VDC, 20°C for 60s

Panasonic

High Voltage Metallized Polypropylene Film Capacitors – ECWH(V) Series

Designed for applications where high frequency and high pulse are required.

Features: • Low-loss and inherent temperature rise • Excellent electrical characteristics • Flame-retardant epoxy resin coating

Recommended Applications: • High pulse circuits (TV, displays, electronic ballast, etc.)

Electrical Specifications:

• Temperature Range: -25°C ~ 85°C • Rated Voltage: 1250VDC or 1600VDC • Capacitance Tolerance: ±5% • Dissipation Factor: 0.1% or less at 1kHz, 0.2% or less at 10kHz • Withstand Voltage: Between terminals - Rated voltage (VDC) x 150% for 60s Terminal to Enclosure - 1500VAC for 60s • Insulation Resistance: 30,000 MΩ minimum, at 500VDC, 20° for 60s

Metallized Paper Film Capacitors – PME271Y Series

Typical Applications: These capacitors are intended for use as interference suppressors in Y2 (line-to-earth) applications.

Construction: Multi-layer metallized paper. Encapsulated and impregnated in self-extinguishing material meeting the requirements of UL 94V-0.

Features: • Temperature Range: -40°C ~ 100°C • ENEC, UL, CSA approved

Metallized Polypropylene Film Capacitors – PHE840 and PHE850 Series

Typical Applications: For worldwide use as electromagnetic interference suppressor in all X2 and across-the-line applications and Y2 (line-to-earth) applications.

Construction: Metallized polypropylene film encapsulated with self-extinguishing epoxy resin in a box of material meeting the requirements of UL 94V-0.

Features: • Temp. Range: PHE840: -55°C ~ 105°C; PHE850: -55°C ~ 110°C • ENEC, UL, cUL approved

Metallized Polypropylene Film Capacitors – R41/R46 MKP Series

Typical Applications: Interference suppression and across-the-line applications. Suitable for use in situations where failure of the capacitor could lead to danger of electric shock.

Protection: Plastic case, thermosetting resin-filled. Box material is solvent resistant and flame retardant according to UL 94V-0.

Features: • Operating Temperature Range: -40°C ~ 110°C • Climatic Category: 40/110/56 IEC 60068-1 • ENEC, CSA, UL, GB/T approved

Metallized Polyester Film Capacitors – R82 MKT Series

Typical Applications: By-passing, blocking, coupling, decoupling, timing, oscillator circuits

Specifications: • Dielectric: Polyester film (polyethylene terephthalate) • Protection: Plastic case, thermosetting resin-filled. Box material is solvent resistant and flame retardant. • Climatic Category: 55/105/56 IEC 60068-1 • Operating Temperature Range: -55°C ~ 105°C • Capacitance Tolerance: ±5% • Lead Spacing: 5.0mm

Metallized Polyester Film Capacitors – MMK Series

Typical Applications: Bypassing, signal coupling. General purpose for highest reliability.

Construction: Metallized polyester film capacitor. Radial leads of tinned wire are electrically welded to the contact metal layer on the ends of the capacitor winding. Encapsulation in self-extinguishing material meeting the requirements of UL 94V-0.

Features: • Climatic Category: 55/100/56 IEC 60068-1 • Temperature Rating: 85°C • Lead Spacing: 5.0mm

Metallized Polyester Film Capacitors – LDE Series

Construction: • Metallized polyethylene naphtalate, non-encapsulated construction, stacked technology

Features: • Excellent stability vs. temperature, frequency and time • Self-healing • High reliability • Low ESR • Typical failure mode at the end of life, open circuit • No piezoelectric effect • No cracking • No VCC

Technical Specifications: • Climatic Category: 55/125/56 IEC 60286-3 • Operating Temperature Range: -55°C ~ 125°C

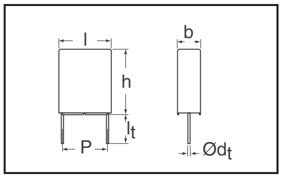
VISHAY. BCcomponents

Metallized Polypropylene Filter Capacitors

MKP 416 Series



Applications: • Low losses due to low contact resistance and low loss dielectric result in applications where high frequency occurs or high stability is preferred • Their small dimensions make them suitable for circuits with high packaging density

Specifications:
• **Rated Temperature (DC):** 85°C • **Capacitance Tolerance:** ±2%

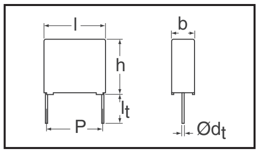
◆ ***RoHS Compliant***

AC and Pulse Double Metallized Polypropylene Film Capacitors

MMKP 383 Series



Features: • Low contact resistance • Low loss dielectric • Small dimensions for high density packaging

Applications: • Electronic lighting, for example, Ballast • Motor control circuits • S-Correction • Where steep pulses occur, for example, SMPS (switch mode power supplies) • For flyback applications please use 1400V series • For hot asphalt encapsulation process

Specifications: • **Rated Temperature (DC):** 85°C • **Rated Temperature (AC):** 105°C • **Maximum Application Temperature:** 105°C • **Capacitance Tolerance:** ±5%

Interference Suppression Film Capacitors

MKP 338 X1, MKP 338 X2, MKP 338 6 Y2, and MKP 339 X2 Series

Feature:
- Consists of a low-inductive wound cell of metallized polypropylene film, potted in a flame-retardant case

X1 Applications:
- For X1 electromagnetic interference suppression • Specially designed to meet the requirements of the "IEC 60384-14 2nd edition and EN 132400", requiring a 4kV peak pulse voltage test UL1414 and CSA-C22.2 No. 1 specifications

X2 Applications:
- For X2 electromagnetic interference suppression • Specially designed to meet the requirements of the "IEC 60384-14 2nd edition and EN 132400", requiring for X2 a 2.5kV peak pulse voltage test and both UL1414 and CSA-C22.2 No. 1 specifications

Y2 Applications:
For standard line bypass (between line and ground) Y2 applications

X1 Specifications:
Rated (AC) Voltage, 50 to 60Hz: 440V **Rated (DC) Voltage:** 1000V **Rated Temperature:** 105°C **C-Tol:** ±20% **Safety Class:** X1; across the line

X2 Specifications:
Rated (AC) Voltage, 50 to 60Hz: 310V **Rated (DC) Voltage:** 630V **Rated Temperature:** 110°C **C-Tol:** ±20% **Safety Class:** X2 across the line

Y2 Specifications:
Rated (AC) Voltage, 50 to 60 Hz: 300V **Rated (DC) Voltage:** 1000V **Rated Temperature:** 105°C **C-Tol:** ±20%

NEW! AC and Pulse Metallized Polypropylene Film Capacitors

MKP 1839 Series

Applications: High current and high pulse operations
Reference Standards: IEC 60384-17
Climatic Testing Class Acc. To EIC 60068-1: 55/110/56
Rated Temperature: 85°C
Reliability: • Operation Life > 300,000h • Failure Rate < 5 FIT (40°C and 0.5 x U_R)
Capacitance Tolerance: ±5%

NEW! Metallized Polypropylene Film Capacitors

MKP 1848 Series

Applications: High performance DC filtering applications
Reference Standards: IEC 61071, IEC 60068
Dielectric: Polypropylene film
Climatic Testing Class: 40/85/56
Maximum Application Temperature: 85°C
Lifetime Expectancy: • Operation life time > 100,000h • FIT: < 10 x 10-9/h (10 per 109 component h) at 0.5 x UNdc; 40°C
Capacitance Tolerance: ±5%

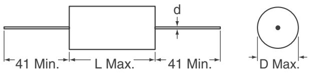
CDE CORNELL DUBILIER

Axial Leaded Power Film Capacitors

Type 940C round, axial film capacitors use polypropylene film and dual metallized electrodes for both self healing properties and high peak current carrying capability (dV/dt). This series features low ESR characteristics, excellent high frequency and high voltage capabilities.



Specifications: • Capacitance Tolerance: ±10% • Operating Temperature Range: -55°C ~ 105°C

947C Series Metallized Polypropylene Power Film Capacitors

High Capacitance, High Current, DC Link Capacitance

The 947C series uses the most advanced metallized film technology for long life, high reliability in DC link applications. Their high-voltage and high-current ratings allow for replacement of series-parallel banks of aluminum electrolytic capacitors in high ripple current applications.

Specifications:

- Operating Temperature Range with Ripple: -40°C ~ 85°C @ rated voltage
- Life Test: 5,000 hours @ 85°C @ rated voltage

ElectroFilm Metallized Polypropylene Capacitors

Specifically designed for DC high ripple current applications. Constructed with low-loss ElectroFilm construction, the UNL series offers high ripple current capabilities and high capacitance values making them ideal for aluminum electrolytic replacement or applications requiring high ripple current capacitors.

Features: • Exceptionally low ESR • Up to 10 times the ripple current • 1.25 times rated surge voltage • Non-polar • Higher voltage ratings • Dry construction - no electrolyte • Improved reliability

Applications: • High voltage inverters • DC bus link • DC filtering

Specifications: • Capacitance Tolerance: ±10% • Operating Temperature Range: -55°C ~ 85°C • Insulation Resistance: ≥ 10,000MΩ

NEW! 944U Series Medium Power Film Capacitors

The 944U series is specifically designed for use in medium power DC filtering applications. The robust internal construction utilizes low loss metallized polypropylene for high ripple current capability. They are packaged in a rugged UL94V-0 rated flame retardant plastic case with a UL94V-0 rated thermosetting epoxy fill.

Specifications: • Operating Temperature Range: -40°C ~ 85°C with ripple • Capacitance Tolerance: ±10%

CDE CORNELL DUBILIER

NEW! MPF Series AC Motor Run Capacitors

RoHS COMPLIANT

Oil Filled Metallized Polypropylene Capacitors

The MPF AC metallized polypropylene film dielectric capacitors offer a reliable option for AC applications. All devices are oil filled in metal cases with 4-prong quick disconnect terminals for easy assembly. These capacitors pack high capacitance and voltage capabilities into a small, light-weight package. The MPF is internally protected for fail-safe operation and they have extremely low DF that is ideal for AC motor-run applications.

Specifications:
• Capacitance Tolerance: ±10% • Operating Temperature Range: -40°C ~ 70°C • Dissipation Factor: 0.1% maximum @ 60Hz

NEW! SF Series Motor Run and Power Supply Capacitors

RoHS COMPLIANT

Oil Filled / Impregnated Metallized Polypropylene Capacitors

The SF Series AC rated metallized polypropylene capacitors provide starting torque and power factor correction for split phase motors typically used in refrigeration and air conditioning motor-run applications. Type SF also may be used to provide noise suppression, voltage regulation and line current reduction in power supply applications.
Specifications: • Capacitance Tolerance: ±10% • Operating Temperature Range: -40°C ~ 70°C • Dissipation Factor: <0.1%

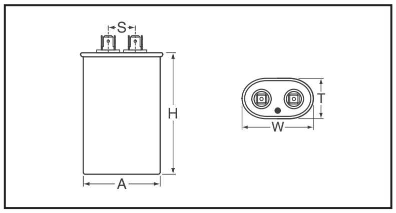
NEW! Metallized Polypropylene Oil Filled Motor Run Capacitors



Construction: • Dielectric: polypropylene film • Electrode: Metallized film • Aluminum can, metal top • Filling material: Vegetable oil, PCB free • Insulator material as per IEC 60335-1

Features: • Self-healing properties • Low dissipation factor • Overpressure disconnection device • Highest safety level P2 to IEC 60252-1 2001-02 • High insulation resistance • IEC/EN 60335 compatible

Typical Applications: • For general sine wave applications, mainly as motor run capacitor

Specifications: • UL 810 / IEC 60252-1 / EIA 456 A Jan.89 • Rated frequency: 50/60 Hz • Climatic category: 40/070/21

Film Chip Capacitors PEN Dielectric – CB Series

The CB Series film chip capacitors use a naked and stacked construction with metallized PEN (polyethylene naphtalate). The use of high temperature dielectric films make these capacitors suitable for IR or vapor phase reflow processes. The intrinsic elasticity of the dielectric film allows an excellent compatibility of the capacitor with all types of material for printed circuit boards. The self-healing property of film technology results in a safe open failure mode and better overall reliability.

Features: • Excellent thermal shock resistance • Low dissipation factor ESR and ESL • No piezoelectric effect • Non-polar construction

Applications: • General purpose function in low voltage applications where miniaturization and SMD is required

Specifications: • Climatic Category: 55/125/56 • Operating Temperature Range: -55°C ~ 125°C with voltage derating of 1.25%/°C between 105°C and 125°C

TPC Polyester Film Capacitors

Description: • Dielectric: Metallized polyester film (polyethylene teraphtalate) • Stacked-film • Leads: Radial tin-plated wire • Protection: Plastic case (UL 94V-0) / Epoxy resin • Marking: Logo, Nominal Capacitance, Tolerance (EIA), DC Nominal Voltage

Features: • Non-inductive, self-healing, metallized polyester film capacitor • Insulated thermoplastic casing, epoxy resin sealed with stand-offs, flame retardant resin and case according to UL 94V-0 • Radial connections with a lead spacing of 5.08mm

Applications: • Supply decoupling, filter, integrators, treatment of analog signals, rejection of line perturbations

Standardization: • Generic Specifications: CEI 384-1/CECC 30000/UTE 83100 • Sectional

Specifications: CEI 384-2-CECC 30400/UTE 83151 • Complies with Special Specifications: CECC 30401-063 • On the LNZ list: Complies with type CPM-N; RAQ2 production, equivalent AQAP-4 of NATO

AVX TPC Medium Power Film Capacitors

The FFB, FFVE, FFVI and FFV3 series use a non-impregnated metallized polypropylene or polyester dielectric, which features a controlled self-healing process, specially treated to have a very high dielectric strength in operating conditions up to 105°C. They have been designed for printed circuit board mounting. Furthermore, their performance allows them to be an alternative to electrolytic technology because they can withstand much higher levels of surge voltage. One unique feature of this technology (as opposed to electrolytics) is how the capacitor reacts at the end of its lifetime. With an electrolytic, there is a strong risk of explosion of the case. However, with this line of film capacitors, the capacitor will simply experience a loss of capacitance of about 2% at the end of its life. This loss of capacitance is theoretical because the capacitor continues to be functional even after this 2% decrease.

Applications: • The FFB, FFVE, FFVI and FFV3 series are particularity designed for DC filtering, low reactive power.

General Characteristics: • Climactic Category: 40/105/56 IEC 60068 (FFV3 Series) 55/105/56 IEC 60068 (FFB) • Test Voltage between terminals at 25°C is 1.5 X Vndc

The FPG series are metallized polypropylene dielectric capacitor with controlled self-healing. Reinforced metallization on margins developed for high impulse currents. Axial connections specially developed to reduce series inductance and to provide rigid mechanical mounting.

Applications: • Protection of gate turn-off thyristor (G.T.O.) • Medium frequency tuning.

General Characteristics: • Climatic category: 40/085/56 IEC 60068

The FFVS series is a specific range of DC filtering capacitors and will be used everywhere standard FFVE or FFVI series caps cannot be used due to very high frequency ripple current. Due to sophisticated internal design, stray inductance is extremely low, between 8 and 13nH function of the model.

Applications: • Induction heating • Resonant DC power supply for scanner • X-ray machines

Panasonic® AC Film Capacitors

Stack Type: Panasonic's "stack type" construction offers significant reduction in case size (compared to oil-filled can type) with a built-in mounting foot.

Features: • Compact size compared to oil-filled type capacitors • 0.187 inch (4.75mm) terminals standard (0.250 inch [6.35mm] available) • 180, 200, 230 are standard voltages • U.L. 810 (File # E76560) and C.S.A listed (CSA-C22.2 No. 0-M91 File # LR99617) • JIS standard is available. (JIS C 4908) • Primary applications: refrigeration, motor run, lighting, etc. • Flame retardant plastic case is rated 94 V-0

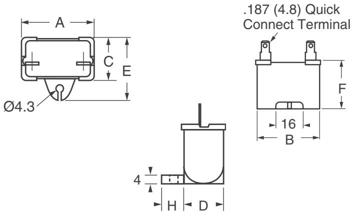
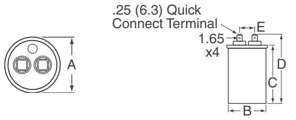
◆ ***RoHS Compliant***



Wound Type: Panasonic's "wound type" construction brings dry film technology to higher voltage and microfarad applications, not available from our "stack type" construction.

Features: • Replacement for typical oil-filled aluminum or plastic can capacitor • Compact size —ideal where space is a premium • Built-in mounting bracket eliminates need for mounting strap • Meets U.L. 810 (File #E76560) • Primary applications: motor run, lighting, etc. • Terminals: 0.187 inch (4.75mm)



Oil Wound Type – ***Metallized polypropylene film:***

Features: • Self protection function built-in • Low-Loss and inherent temperature rise • Small and compact

Specifications: • Meets U.L. 810 (File #E76560) • Capacitance Tolerance: -5 ~ 10% • Temperature Range: -25°C ~ 70°C • Insulation Resistance: More than 1000MΩ • Dissipation Factor: Less than 0.3% • Withstand Voltage: Between Terminal: 1.75 x rated voltage for 60 seconds Terminal to Case: 2 x rated voltage for 60 seconds

Applications: • Motor run applications (Air Conditioner/ Refrigerator) • Motor start applications

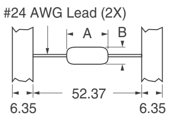
Axial Ceramic Capacitors

Mechanical Parameters:

Terminal Strength: 2.2 Kg (5 lbs.) Minimum pull to destruction, per Method B5 of RS-198-CII, Test Condition A. **Lead Materials:** #24 AWG (.020" ±0.001") Tinned, Copper Clad Steel. 30% Conductivity. Temper: Soft; Tensile Strength: 65000 PSI Maximum
Body: Conformally coated Epoxy.

Electrical Parameters:

Capacitance: Measured @ 1Mhz @ 1.0 ±0.2 VRMS @ 25°C for C0G types with C ≤1000pF. Measured @ 1Khz @ 1.0 ±0.2 VRMS @ 25°C for C0G types with C >1000pF. Measured @ 1Khz @ 1.0 VRMS ±.2 VRMS @ 25°C for X7R types. **Dissipation Factor:** .1% Maximum for C0G types, 2.5% Maximum for X7R types; measurement conditions are the same as for capacitance measurement. **Dielectric Strength:** Parts are subjected for up to 5 seconds @ 25°C to 250% of Rated Voltage and will exhibit no evidence of breakdown. **Insulation Resistance:** When measured @ 25°C and Rated Voltage, the following Minimum Values will be met: 100KMΩ or 1000MΩ x µF (whichever is less). **Body Insulation:** 500VDC Minimum, in accordance with RS-198-CII. **Operating Temperature Range:** -55°C ~ 125°C for C0G, -55°C ~ 125°C for X7R.
Packaging: Mono-Axial parts are supplied in tape and reel and form per EIA RS-296.



Taped and Reeled per EIA RS-296E

Class II Equipment. Type NS-A is recognized by UL and CSA (UL1414/250VAC and CSA C22.2 No. 1).

SPECIFICATIONS:

- **Operating Temperature Range:** -25°C ~ 85°C
- **Rated Voltage:**

Applicable Standards	Rated Voltage
UL	250 VAC
CSA	125 VAC
IEC 384-14 2nd Ed. (EN 132 400) Sub-Class Y1	250 VAC
SEV 1016 (3300 to 4700 pF)	250 VAC
BSI (BS415: 1990), VDE 560-2, SEV1016 (100 to 2200 pF)	400 VAC

- **Dielectric Withstanding Voltage:** 4000VAC (50/60Hz) for 1 minute
- **Capacitance:** Within the tolerance, when measured at 1kHz ± 20%, 1 Vrms and 20°C
- **Dissipation Factor (tan δ):** 0.025 maximum, when measured at 1kHz ± 20%, 1 Vrms and 20°C
- **Insulation Resistance:** 10,000MΩ min. at 500VDC and 1 minute electrification
- **Temperature Characteristics:**

Temp. Char.	Capacitance Change	Temp. Range
B/Y5P/2B4	±10% Maximum	-25°C ~ 85°C
E/Y5U/2E4	+20/-55% Maximum	-25°C ~ 85°C
The reference temperature: 20°C		

Ceramic Disc Capacitors for Safety Regulations – Type TS

(IEC384-14 2nd Ed. Sub-Class Y2/X1)

F

Approved by UL and CSA for rated voltage 250VAC.

RECOMMENDED APPLICATIONS:
Noise suppression circuit for switching power supply.

SPECIFICATIONS:

- **Operating Temperature Range:** –25°C ~ 125°C
- **Rated Voltage:** 250VAC
- **Voltage Proof:** 2600VAC for 1 minute
- **Capacitance:** Within the tolerance, when measured at 1kHz ±20%, 1 Vrms and 20°C
- **Dissipation Factor (tan δ):** 0.025 maximum, when measured at 1kHz ± 20%, 1 Vrms and 20°C
- **Insulation Resistance:** 10,000MΩ min. at 500VDC and 1 minute electrification
- **Temperature Characteristics:**

Temperature Characteristics	Capacitance Change	Temperature Range
B/Y5P/2B4	±10% Maximum	-25°C ~ 85°C
E/Y5U/2E4	+20/-55% Maximum	-25°C ~ 85°C
F/Y5V/2F4	+30/-80% Maximum	-25°C ~ 85°C
The reference temperature: 20°C

Ceramic Disc Capacitors for Safety Regulations – Type VS (Sub-Class Y2/X1)

Type VS is recognized by VDE (IEC60384-14) and UL/CSA.

FEATURES:

- Miniature size, 30% smaller than conventional Type TS

RECOMMENDED APPLICATIONS:

- AC adapter, Battery charger for PC, Mobile-phone
- Terminal peripheral equipment as MODEM, xDSL

SPECIFICATIONS:

- **Operating Temperature Range**: -25°C ~ 125°C (-25°C ~ 85°C for UL and CSA)
- **Rated Voltage:** 250VAC/Y2, 440VAC/X1
- **Voltage Proof:** 1500VAC, 1 minute
- **Dissipation Factor (tan δ):** 0.025 maximum, when measured at 1kHz ± 20%, 1.0±0.2 Vrms and 20°C (for Temperature Characteristics B, E and F)
- **Insulation Resistance:** 10,000MΩ min. at 500VDC and 60±5 second electrification

Temp. Char.	Capacitance Change	Temperature Range
SL	+350 ~ -1000ppm/°C	20°C ~ 85°C

KEMET Ceramic Conformally Coated Axial Leaded Capacitors “AXIMAX”

The “Aximax” series of multi-layer ceramic capacitors starts with a capacitor element that consists of formulated dielectric materials which have been cast into thin layers, interspersed with metal electrodes alternately exposed on opposite edges of the laminated structure. The entire structure is fired at high temperature to produce a monolithic block, which provides high capacitance values in a small physical volume. After firing, conductive terminations are applied to opposite ends of the chip to make contact with the exposed electrodes.

KEMET leaded ceramic capacitors are offered in the three most popular temperature characteristics: **C0G:** Class 1, with a temperature coefficient of 0 ± 30ppm per degree C over an operating temperature range of -55°C ~ 125°C (Also known as “NP0”). **X7R:** Class II, with a maximum capacitance change of ±15% over an operating temperature range of -55°C ~ 125°C. **Z5U:** Class III, with a maximum capacitance change of 22% - 56% over an operating temperature range of 10°C ~ 85°C.

Ceramic Conformally Coated Radial Leaded Capacitors

"GOLDEN MAX"

The "Golden Max" series of multi-layer ceramic capacitors starts with a capacitor element that consists of formulated dielectric materials which have been cast into thin layers, and interspersed with metal electrodes alternately exposed on opposite edges of the laminated structure. The entire structure is fired at high temperature to produce a monolithic block, which provides high capacitance values in a small physical volume. After firing, conductive terminations are applied to opposite ends of the chip to make contact with the exposed electrodes.

KEMET leaded ceramic capacitors are offered in the three most popular temperature characteristics: **C0G:** Class 1, with a temperature coefficient of 0 ±30ppm per degree C over an operating temperature range of -55°C ~ 125°C (Also known as "NP0"). **X7R:** Class II, with a maximum capacitance change of ±15% over an operating temperature range of -55°C ~ 125°C. **Z5U:** Class III, with a maximum capacitance change of 22% ~ 56% over an operating temperature range of 10°C ~ 85°C.

Capacitor Kit

399-5086-ND (Kemet Part No. CER ENG KIT 08)
High Voltage Capacitor Kit, 400 total pieces (See Digi-Key website for values included) **$54.00**

Panasonic® Interference Suppressor Capacitors X-Y Series-Metallized Film

Electrical Specifications: • **Operating Temperature Range:** -40°C ~ 85°C (-40°C ~ 100°C for ECQ-UG/UL) • **Capacitance Tolerance:** ±20% (M) • **Dissipation Factor:** Less than 1.0% (at 20°C 1 kHz)

ECQ-UN Series: **Rated Voltage:** 250VAC. **Standards: UL (UL 1414);** Across-The-Line Capacitor, Antenna Coupling and Line-By-Pass Capacitors. File No. E62674. **CSA (CSA C22.2);** No. 0-M1982, No. 1-M1981. Across-The-Line, antenna-isolation and line-by-pass capacitor. File No. LR35752. **VDE (VED0565-1);** class X2 File No. 4811.6-4670-1041. **SEV (SEV1055);** class X, Ref No. 89, 5 50251,05. **DEMKO (AFSNIT21);** class X2, Ref No. 70726EC. **SEMKO (SS4430414);** class X2 Reg No. 8602146. **NEMKO (NEMKO);** class X2 Ref No. E 25082 02. **EI (E384-14);** class X2, Reg No. 062521 01~14(0.001~0.012µF), Reg No. 062522 01~15(0.015~0.22µF).

ECQ-EW Series: **Rated Voltage:** 250VAC. **Standards: UL (UL 1283);** Electromagnetic Interference Filters Class X File No. E79502. **SEMKO (SS 443 04 14);** class X2 Reg No. 8932009. **DEMKO (AFSNIT21);** class X2 Ref No. 94911EC. **VDE (VDE0565-1);** class X2 File No. 4811. 6-4670-1035.

ECQ-UF Series: **Rated Voltage:** 250VAC **Standards: SEMKO (SEMKO 101)** Reg. No. 61-88271/1-4. **DEMKO (AFSNIT 21);** class Y/X, Ref No. 61254EC. **VDE (VDE 0565-1)** class Y/X2, File No. 4811-6-1-4670-1032. **BSI (BS415);** certified No. 6026. **UL (UL1414)** Across-The-Line Capacitor & Antenna-Coupling and Line-by-pass. File No. E62674. **CSA (CSA C22.2)** No. 0-M1982, No.1-M1981, Across-The-Line, Antenna-Isolation and LIne-by-Pass Capacitor, File No. LR35752.

ECQ-UV Series: **Rated Voltage:** 250VAC **Standards: UL (UL1414);** Across-The-Line Capacitors, Antenna-Coupling and Line-by-Pass Capacitors. File No. E62674. **(UL1283);** Electromagnetic Interference Filters, File No. E79502. **CSA (CSA C22.2);** Across-The-Line, Antenna-Isolation and Line-by-Pass Capacitor, No. 0-M1982, No. 1-M1981. **SEMKO (SS 443 04 14);** class X2/Y Reg No. 8804123. **DEMKO (AFSNIT21);** class X2/Y Ref No. 89275EC. **NEMKO (NEMKO 132);** class X2 Ref No. 37892, class Y Ref No. 37894. **EI (IEC 384/14);** class X2/Y Reg No. 110918-01-02. **VDE (VDE 0565-1);** class X2/Y File No. 4811.6-4670-1070. **SEV (SEV 1055);** class X ref No. 88,1 00318,01.

ECQ-UG — Class X1 Series: **Rated Voltage:** 250/300VAC **Standards: UL (UL1414);** Across-The-Line Capacitors, Antenna-Coupling and Line-by-Pass Capacitors. **CSA (Standard C22.2 No. 1-94);** Across-The-Line Capacitors. Antenna-Isolation and Line-by-Pass Capacitors. **FIMCO and VDE;** IEC384-14, 1993, A1 - 1995, EN132400, Class X1.

ECQ-UL Series: **Rated Voltage:** 250/275VAC **Standards: UL (UL1414);** Across-The-Line Capacitors. Antenna-Coupling and Line-by-Pass Capacitors. **CSA (Standard C22.2 No. 1-94);** Across-The-Line Capacitors., Antenna-Isolation and Line-by-Pass Capacitors. **VDE;** IEC384-14, 1993, EN132400, Class X2.

◆ ***RoHS Compliant***

Multilayer Ceramic Capacitors

COG:

Features:

- Good thermal stability • High insulation resistance • Low dissipation factor • Low inductance

Applications:

- Resonant circuits • Timing elements • Coupling and filtering, particularly in RF circuits

Electrical Data:

- Dielectric: Class 1 • Operating temperature range: -55°C ~ 125°C

X7R:

Features:

- High volumetric efficiency • Non-linear capacitance change • High insulation resistance • High pulse strength

Applications:

- Blocking • Coupling • Decoupling • Interference suppression

Electrical Data:

- Standard: EIA • Dielectric: Class 2 • Operating temperature range: -55°C ~ 125°C

Z5U (Y5U):

Features:

- Extremely high volumetric efficiency • Non-linear capacitance change • Y5U characteristic is also fulfilled

Applications:

- Blocking • Coupling • Decoupling • Interference suppression

Electrical Data:

- Standard: EIA • Dielectric: Class 2 • Operating temperature range: -30°C ~ 85°C

AVX TPC Epoxy Coated AC and Switch Mode Ceramic Disc Capacitors

These capacitors are made of a new dielectric compound specially developed for AC or switch mode circuits that can generate dielectric heat, which is the limiting factor on other ceramic disc capacitors.

This series adds the advantages of Class 1 capacitors (low loss factor) with the advantages of Class 2 capacitors (small size and lower cost). These capacitors are epoxy coated, flame retardant class UL94V-0. They meet the standards of the telecom and data processing industry. They are particularly suited for TV deflection and power supply circuits.

Specifications:

- Insulation Resistance @ 500V: ≥10GΩ
- Operating Temperature: -40°C ~ 125°C

◆ ***RoHS Compliant***

AVX TPC Radial Leaded Ceramic Disc Capacitors

RoHS COMPLIANT

Class 1 Dielectric Features: These ceramic capacitors have a linear temperature coefficient, very low tolerances, low losses, high insulation resistance, and are especially suited for tuned circuits, timing and other precision circuits. **Specifications:** • Insulation Resistance: ≥10GΩ • Operating Temperature Range: -30°C ~ 85°C

SL Dielectric Features: These capacitors have wide temperature characteristics but still offer low loss and linear type temperature coefficients. They are specially designed to be a smaller alternative to standard Class 1 capacitors of linear temperature coefficient. Typical application is RF tuning. **Specifications:** • Operating Temperature: -30°C ~ 85°C

Class 2 Dielectric Features: These ceramic capacitors have a high dielectric constant, which makes possible high capacitance values in reduced dimensions. However, temperature coefficient and loss factor are greater than Class 1. Typical applications include decoupling and bypass. **Specifications:** • Insulation Resistance: ≥10GΩ • Operating Temperature Range: -30°C ~ 85°C

Class 3 Dielectric Features: A thin dielectric layer is grown on a disc of conductive ceramic. Very large capacitances can be obtained due to reduced thickness of this barrier layer and its inherently high dielectric constant. Due to its small dimensions, they are a less expensive replacement of multilayer ceramic or polyester capacitors. **Specifications:** • Operating Temperature Range: -30°C ~ 85°C

AVX TPC Safety Ceramic Disc Capacitors

X Function: Applications where the capacitor failure does not lead to the danger of electrical shock. There are 3 subclasses related to the peak voltage of the impulses superimposed to the main voltage; Subclass X1: Impulses up to 4kV; Subclass X2: impulses up to 2.5kV.

Y Function: Applications where the capacitor failure may lead to the danger of electrical shock. There are 4 subclasses related to the peak voltage of the impulses applied before life test. Subclass Y1: Impulses up to 8kV; Subclass Y2: Impulses up to 5kV; Subclass Y3: Rated for 250VAC without impulses.

AVX AR Series SkyCap® Automotive Radial Leaded Ceramic Capacitors

The SkyCap series is the industry leading conformally coated radial leaded multilayer capacitor.

Case Materials:

• Epoxy • Lead Material: 100% Tin • Qualified to AEC-Q200 • Temperature Range up to 150°C

AVX SkyCap® Radial Leaded Ceramic Capacitors

The SkyCap series is the industry leading conformally coated radial leaded multilayer capacitor.
Applications: • Decoupling • Filtering • Automotive

Size Code	Dimensions – Inch (mm) W Max.	H Max.	T Max.	L.S

SE/SK Series SMPS Radial Leaded Ceramic Capacitors

The SE/SK series capacitors from AVX are conformally coated MLC capacitors for input or output filtering in switch mode power supplies. They are specially processed to handle high currents and are low enough in cost for commercial SMPS applications.

Specifications:

- Operating Temperature: ***C0G and X7R:*** -55°C ~ 125°C; ***Z5U:*** 10°C ~ 85°C
- Lead Length: 25.4mm minimum

AVX High Voltage Leaded Ceramic Capacitors

SV Series

High value, low leakage, and small size are difficult parameters to obtain in capacitors for high voltage systems. AVX's SV series lead capacitors meet these performance characteristics. These special design criteria result in significant reduction of partial discharge activity within the dielectric and having, therefore, a major impact on long-term reliability of the product. The SV high voltage radial capacitors are conformally coated with high insulation resistance, high dielectric strength epoxy eliminating the possibility of arc flashover. This series also exhibits low ESR at high frequencies. The same criteria governing the high voltage design carries the added benefits of extremely low ESR in relatively low capacitance and small packages. These capacitors are designed and are ideally suited for applications such as snubbers in high frequency power converters, resonators in SMPS, and high voltage coupling/DC blocking.

NEW! SMPS Ceramic Radial Capacitors

SXP style, encapsulated radial leaded MLC capacitors are ideally suited for high temperature applications up to 200°C. This product is intended for downhole oil exploration, including logging while drilling, geophysical probes, as well as space, aerospace and hybrid automotive applications. This product supplements the SMX family of capacitors and offers mechanical protection to the ceramic element in extreme harsh environment. The high temperature solder utilized in the construction of SXP style parts assures reliable operation in high temperature and rugged environments. The SXP style capacitors are ideally suited for applications as DC filters in high power, high frequency motor drives, high pulsed-current circuitry, as well as standard electronic equipment designed for high temperature applications.

Specifications: • Capacitance Tolerance: ±10% • Operating Temperature Range: -55°C ~ 125°C • Insulation Resistance: (25°C, @ 500V) 100KMΩ minimum, or 1000 MΩ-µF minimum, whichever is less • Dissipation Factor: 2.5% maximum

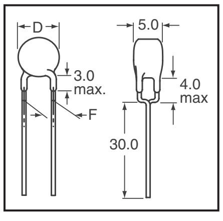
VISHAY BCcomponents Safety Standard Approved Ceramic Disc Capacitors — EMI/RFI Y1-VY1 and Y2-VY2 Series



Specifications: • Dissipation Factor: 2.5% Maximum • Category Temperature Range: -40°C ~ 125°C • Climatic Category: 40/125/21 according to EN60068-1 • Coating: According to UL94V-0; Epoxy resin, isolating, flame retardant • WEEE/RoHS: Components in accordance with EU Directive 2002/95/EC • Insulation Resistance: 10,000MΩ Minimum

Approvals: • ***Y1-VY1 Series:*** ENEC VDE (DE1-32019), UL 1414 file E183844 and CSA 22.2 • ***Y2-VY2 Series:*** ENEC-VDE (DE1-30691), UL 1414 file E183844 and CSA 22.2

Features: • Complying with "EN 132 400" and "IEC 60384-14, 2nd edition, including amendment 1.1995" • High reliability • Vertical (in-line) kinked leads

Applications: • Across-the-line • Line by-pass • Antenna coupling • X1, Y1 according to IEC 60384-14.2 for Y1-VY1 Series only

Rated Voltage: • ***Y1-VY1 Series:*** IEC 60384-14.2; (X1): 760VAC, 50Hz; (Y1): 500VAC, 50Hz; 250VAC, 50/60Hz, UL 1414 and CSA22.2; • ***Y2-VY2 Series:*** IEC 60384-14.2; (X1): 440VAC, 50Hz; (Y2): 300VAC, 50Hz;

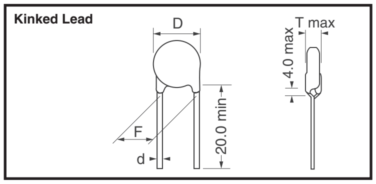
Panasonic

High Voltage Ceramic Disc Capacitors

KBP Characteristics Y5P, 1 to 3 kVDC



Features: • Wide operating temperature: -25° ~ 125°C • Improved in "Voltage vs. Temperature Rise" through low-loss ceramic dielectric material applied • Flame-retardant insulating coating applied • Easy mounting through Kinked Lead
Recommended Applications: • Snubber circuit of switching power supply • Horizontal resonance circuit of TV and CRT display • Inverter type lighting apparatus • High voltage pulse and DC circuits
Specifications: • **Chacteristic:** KBP • **Operating Temperature Range:** -25° ~ 125°C • **Rated Voltage:** 1-3 kVDC • **Dielectric Withstanding Voltage:** Rated voltage 1 to 3 kVDC: 200% of rated voltage for 1 to 5 seconds • **Capacitance:** Within the specified tolerance when measured at 1 kHz ± 20%, 1 to 5 Vrms, and 20°C • **Q or Dissipation Factor:** Tan∂ ≥ 0.025 • **Insulation Resistance:** 10,000MΩ minimum at 500VDC 1 minute electrification • **Temperature Characteristics:** Temperature Coefficient: +350 ~ -1000 ppm/°C (Temperature Range: 20° ~ 85°C) • Y5P: Maximum capacitance change is ±10% over temperature range of -25° ~ 85°C

Panasonic® Ceramic Disc Capacitors

Class 2, High Dielectric Constant

Features:

- Large capacitance in small size • Minimum coating resin on leads

Applications:

- Coupling and By-pass, where low losses and high stability of capacitance are not so important

Specifications:

- Operating Temperature Range: -25°C ~ 85°C • Rated Voltage: 25VDC • Dielectric Withstanding Voltage: 250% of the rated voltage for 1 to 5 seconds (no damage occurs when the test voltage is applied between terminals) • Capacitance: measured at 1kHz ±10%, 1 Vrms and 20°C within the specified tolerance - standard capacitance tolerance [Z4V]: +80/-20%
- Dissipation Factor: [Z4V]: D.F. ≤0.05 • Insulation Resistance: C≤0.02 μF: ≥10000MΩ, C>0.02 μF: CR products ≥ 200MΩ (measured at the rated voltage and 1 minute electrification)
- Temperature Characteristics:

$$\text{Cap. Change} = \frac{\triangle C}{C_20} \quad x100\%$$

Where C_20: Capacitance value in pF at the specified reference temperature of 20°C.

△C: Capacitance drifts in pF from the capacitance value at 20°C over the specified temperature range.

Temperature Characteristics	Maximum Capacitance Change	Temperature Range
Z4V	+30/-80%	0°C ~ 70°C

Class 1, Temperature Compensating

Features: • Wide product range for temperature compensation • Liner temperature coefficient of capacitance • High stability of capacitance and close tolerance • Low loss at wide range of frequency

Applications: • Temperature compensation of resonant circuit and filters • Where low losses and high stability of capacitance tolerance and high insulation resistance are required

Specifications: • Operating Temperature Range: -25°C ~ 85°C • Rated Voltage: 50VDC, 500VDC • Dielectric Withstanding Voltage: 300% of the rated voltage for 1 to 5 seconds (no damage occurs when the test voltage is applied between terminals) • Capacitance: measured at 1MHz ±20%, 5 Vrms. max. and 20°C within the specified tolerance - standard capacitance tolerance: ±0.25 pF (1 to 5 pF), ±0.5 pF (1 to 10 pF), ±1 pF (10pF), ±5% (Over 10 pF NP0), ±10% (Over 10 pF GP) • Q Factor: Cap. <30 pF: Q≥400+20XC (c: Rated capacitance in pF), Cap≥30 pF: Q≥1000 • Insulation Resistance: ≥10000 MΩ (measured at the rated voltage and 1 minute electrification) • Temperature Coefficient of Capacitance: Temperature Range: -25°C ~ 85°C, Reference Temperature:

$$20°C,\ \text{T.C.} = \frac{\triangle C}{C_20 \times \triangle T}$$

Where: C_20: Capacitance value in pF at the specified reference temperature of 20°C. △C: Capacitance drifts in pF from the capacitance value at 20°C. △T: The specified temperature range to be measured in °C.

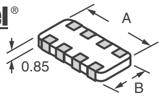
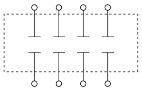
Panasonic® Multilayer Ceramic Chip Capacitor Arrays

ECJ-T and ECJ-R Series

Digi-Reel®





Features:
• Four capacitors built in type in the miniature size of 0805 and 1206 • Improvement of placement time on mounting machines • Low self-inductance and excellent frequency characteristics **Recommended Applications:** • Input/Output circuit computer's mother board - serial, video and parallel ports

◆ ***RoHS Compliant***

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic® Multilayer Ceramic Chip Capacitors 2-Fold Array Type

Digi-Reel® RoHS COMPLIANT

Features: • 2 Capacitors built in the miniature size of 0504 **Specifications:** • Operating Temperature Range for NPO: -55°C ~ 85°C • Operating Temperature Range for X5R: -55°C ~ 125°C **Recommended Applications:** • Stabilizing of power supply voltage and Noise filtering as Decoupling capacitors for Digital IC power circuit • Bypass capacitors for CPU digital signal

Ceramic Disc Capacitors High Voltage Rated 1 to 6 kVDC, Temperature Characteristics SL/GP — KGE Type

Features: • Wide operating temperature range: -25°C ~ 105°C • Low loss at wide frequency range and stable against high voltage pulses • Temperature stable (Character SL/GP) • Flame-retardant insulating coating applied

Recommended Applications: • Ballast circuit of LCD backlighting inverter • Snubber circuit of switching power supply • Horizontal resonance circuit of TV and CRT display • Inverter type lighting apparatus • High voltage pulse and DC circuits

Specifications: • **Operating Temperature Range:** -25°C ~ 105°C • **Rated Voltage:** 1kVDC, 2kVDC, 6kVDC • **Dielectric Withstanding Voltage:** 200% of the rated voltage for 1 to 5 seconds • **Capacitance:** Within tolerance, when measured at 1MHz ±20%, 1 to 5 Vrms, and 20°C • **Q Factor:** Capacitance <30pF: Q≥400+20C (C: Rated Capacitance in pF). Capacitance ≥30pF: Q≥1000 at 1 MHz±20%, 1 to 5 Vrms, and 20°C • **Insulation Resistance:** 10,000 MΩ minimum at 500 VDC and 1 minute electrification • **Temperature Characteristics:** Temperature Coefficient: +350 ~ -1000 ppm/°C over the temperature range of 20°C ~ 85°C

HD Series High Voltage Ceramic Disc Capacitors — Y5P Type

Features: • Improved "Voltage vs. Temperature Rise" **Characteristics:** • High reliability using zinc-copper electrode **Application:** • Horizontal resonance circuit of TV and CRT display **Specifications:** • Operating Temperature Range: -25°C ~ 125°C • Dielectric Withstanding Voltage: 200% of rated voltage for 1 to 5 seconds • Capacitance: Measured at 1kHz ±20%, 1 to 5 Vrms and 20°C within the specified tolerance (±10%) • Tangent of loss angle: Measured at 1kHz ±20%, 1 to 5 Vrms and 20°C at 1.5% or less • Insulation Resistance: 500 ± 50VDC and 1 minute electrification at 10,000MΩ or more • Temperature Characteristics: Y5P ±10% (temperature range: -20°C ~ 85°C)

◆ ***RoHS Compliant***

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic®

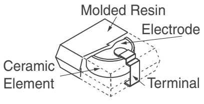
High Voltage Ceramic Capacitors (SMD)

FEATURES:

• Resin molded type for reflow solderings • High reliability through disc capacitor element molded construction • Excellent "Voltage vs. Temperature Rise" through low loss ceramic dielectric • Temperature stable (SL/GP) and (B/Y5P)

SPECIFICATIONS:

• Operating Temperature Range: -25°C ~ 105°C • Insulation Resistance: 10,000MΩ minimum at 500VDC and 1 minute electrification • Q or Dissipation Factor (tan δ): *SL/GP Temperature Characteristics:* C < 30pF: Q ≥ 400+20 C (C:cap.pF), C ≥ 30pF: Q ≥ 1000 at 1MHz, 1-5Vrms and 20°C *B/Y5P Temperature Characteristics:* D.F. (tan δ) ≤0.025 at 1KHz, 1-5Vrms and 20°C • Temperature Characteristics: *SL/GP* Temperature Coefficient: 350 ~ -1000ppm/°C *B/Y5P* Maximum Capacitance Change: ΔC/C≤±10% (Temperature Range: -25°C ~ 85°C) • Capacitance: *SL/GP Temperature Characteristics:* 1MHz, 1-5Vrms and 20°C *B/Y5P Temperature Characteristics:* 1KHz, 1-5Vrms and 20°C • Dielectric Withstanding Voltage: *SL/GP Temperature Characteristics,* (Voltage 4kVDC): 150% of the rated voltage for 1-5 seconds *SL/GP Temperature Characteristics,* (Voltage 2-3KVDC): 200% of the rated voltage for 1-5 seconds. *B/Y5P Temperature Characteristics:* 200% of the rated voltage for 1-5 seconds



RECOMMENDED APPLICATIONS:

- Output circuit of LCD backlighting inverter
- Snubber circuit of switching power supply
- High voltage circuit

Ceramic Capacitors for Safety Regulations — Type BC (SMD)

Digi-Reel®

FEATURES: • Resin molded type for reflow soldering surface mountings • High reliability through disc capacitor element molded construction • Related by IEC 384-14 sub-class Y2/X1 and Japan Domestic Safety Regulations • One standard size cover wide capacitance range for 1000pF to 4700pF

APPLICATIONS: • On-board type power module • DC-DC Converter • FAX Modulator-Demodulator

Ceramic Capacitors for Safety Regulations — Type FC (Sub-Class Y2) (SMD)

Digi-Reel®

FEATURES: • Safety Capacitor for reflow soldering process • Approved by SEMKO (IEC60384-14/ EN132400 Sub-class Y2) and UL/CSA (Line-by-pass Capacitors) • High reliability through disc capacitor element with resin molded construction

RECOMMENDED APPLICATIONS: • DC-DC Converter, Power module • MODEM, xDSL • Application EX. (MODEM) **RATINGS:** • **Dimensions:** 5.7L x 4.5W X 2.3T (mm) • **Operating Temperature Range:** -25ºC ~ 100ºC • **Voltage Proof:** 1500VAC, 1 minute

Temp. Char.	Capacitance Change	Temperature Range
SL	+350 ~ -1000ppm/°C	+20°C ~ +85°C
B	±10% Maximum	-20°C ~ +85°C
E	+20, -55% Maximum	-20°C ~ +85°C
F	+30, -80% Maximum	-20°C ~ +85°C
The reference temperature: 20°C

Ceramic Disc Capacitors — Type GL

FEATURES:

- Rated: 250VAC
- CSA rating: 125VAC

APPLICATIONS:

- Antenna coupling
- Line-bypass and Across-the-line
- Switching surge killer, etc.

UL 1414 • CSA C22.2 Approved

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic®

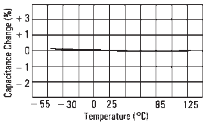
Multilayer Ceramic Chip Capacitors

0201, 0402, 0508, 0603, 0612, 0805, 1206 and 1210

FEATURES: • Small in size and wide capacitance range • Superior humidity characteristic and long life due to the monolithic construction • Excellent solderability and resistance to soldering heat due to terminals with three layers of silver nickel and solder • Low self-inductance and excellent frequency characteristic **RECOMMENDED APPLICATIONS: Class 1 (T.C. Type)**: Temperature compensations, tuned circuits and filter circuits, where low loss and high stability of capacitance and high insulation resistance are required. **Class 2 (HI-K type)**: Coupling and By-pass, where low loss and high stability of capacitance are not so important.

NP0 Type - Class 1:
- Operating temperature range: -55°C ~ 125°C

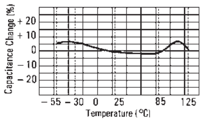
Temperature Coefficient



X7R Type - Class 2:
- Operating temperature range: -55°C ~ 125°C

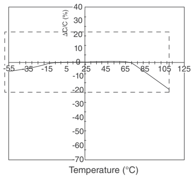
X5R Type - Class 2:
- Operating temperature range: -55°C ~ 85°C

Temperature Coefficient



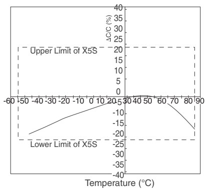
X6S Type - Class 2:
- Operating temperature range: -55°C ~ 105°C

Temperature Coefficient



X5S Type - Class 2:
- Operating temperature range: -55°C ~ 85°C

Temperature Coefficient



Y5V Type - Class 2:
- Operating temperature range: -30°C ~ 85°C (F Type: -25°C ~ 85°C)

Digi-Key® Notebook StyleKit Boxes

Notebook style kit box with velcro closure can be stored as a normal kit box, or vertically as a book. Each compartment is identified with an easy-to-read kit index.

- **PCC17-KIT-ND** ***1206/NP0 Series Kit*** 10 each of values denoted (140 total pieces) **$89.95**

Panasonic® High-Q (Microwave) Multilayer Chip Capacitors 0201 and 0402 High-Accuracy/High-Frequency

Digi-Reel®

Features: • Lead Free • Operating Temperature Range: -55°C ~ 125°C • Low Cap. with Tight Tolerance • High Q value / Low ESR at High Frequency. • Ultra-Stable C0G Performance (0±30 ppm/°C) • 0201 and 0402 Miniature Sizes **Applications (At Microwave Frequency):** • Impedance Matching Circuit • Resonant Circuit • Coupling Circuit **Application Examples:** • RF modules, VCO, BPF, DUP, PA, etc. • Cellular Phone, Bluetooth, Wireless LAN, etc.

AVX Multilayer Ceramic Chip Capacitors

C0G (NP0) Dielectric: • EIA class I ceramic materials • C0G (NP0) ceramics offer one of the most stable capacitor dielectrics available • Operating temperature range: -55°C ~ 125°C • Capacitance change with temperature is 0 ±30ppm/°C which is less than ±0.3% Δ C from -55°C ~ 125°C

X7R/X7S/X8R Dielectric: • Formulations are called “temperature stable” ceramics and fall into EIA class II materials • Its temperature variation of capacitance is within ±15%(X7R/X8R), ±22%(X7S) from -55°C ~ 125°C from -55°C ~ 150°C (X8R)

X5R Dielectric: • General purpose dielectric for ceramic capacitors • EIA Class II dielectric • Temperature variation of capacitance is within ±15% from -55°C ~ 85°C • Operating temperature range: -55°C ~ 85°C

Y5V Dielectric: • Y5V formulations are for general purpose use in a limited temperature range • They have a wide temperature characteristic of +22% ~ 82% capacitance change over the operating temperature range of -30°C ~ 85°C

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Flexisafe Multilayer Ceramic Chip Capacitors

For Ultra Safety Critical Applications

AVX has developed a range of components specifically for safety critical applications. Utilizing the award-winning FLEXITERM™ layer in conjunction with the cascade (MLSC) design previously used for high voltage MLCC's, a range of ceramic capacitors is now available for customers who require components designed with an industry leading set of safety features.

The FLEXITERM layer protects the component from any damage to the ceramic resulting from mechanical stress during PCB assembly or use with end customers. Board flexure type mechanical damage accounts for the majority of MLCC failures.The addition of the cascade (MLSC) structure protects the component from low insulation resistance failure resulting from other common causes for failure: thermal stress damage, repetitive strike ESD damage, and placement damage. With the inclusion of the cascade design structure to complement the FLEXITERM layer, the FLEXISAFE series of capacitors has unbeatable safety features.

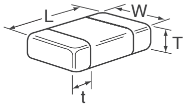
Multilayer Ceramic Chip Capacitors

with Soft Termination



With increased requirements from the automotive industry for additional component robustness, AVX recognized the need to produce a MLCC with enhanced mechanical strength. It was noted that many components may be subject to severe flexing and vibration when used in various under-the-bonnet automotive applications. To satisfy the requirement for enhanced mechanical strength, AVX had to find a way of ensuring electrical integrity is maintained whilst external forces are being applied to the component. It was found that the structure of the termination needed to be flexible and after much research and development, a "soft termination" was found. This soft termination is designed to enhance the mechanical flexure and temperature cycling performance of a standard ceramic capacitor with a X7R dielectric. The industry standard for flexure is 2mm minimum. With Soft Termination, AVX guarantees a minimum flexure of 5mm, without any internal cracks. Beyond 5mm, generally the component will open. The industry standard for temperature cycling is 1,000 cycles - AVX guarantees 3,000 cycles. As well as for automotive applications, the soft termination will provide design engineers with a satisfactory solution when designing PCBs which may be subject to high levels of board flexure.

Features:

- High mechanical performance able to withstand 5mm bend test guaranteed
- Open failure mode is apparent when products are overstressed by 5mm
- Increased temperature cycling performance for 3000 cycles and beyond
- Reduction in circuit board flex failures
- Base metal electrode system.

Hi-Q® MLC Capacitors

The HQ Series capacitors from AVX are a Hi-Q high RF power, surface mount MLC capacitor and are characterized with ultra-low ESR and dissipation factor at high frequencies. They are designed to handle high power and high voltage levels for applications in RF power amplifiers, inductive heating, high magnetic field environments (MRI coils), medical, and industrial electronics.

Specifications: • Dissipation Factor @ 25°C: 0.1% Maximum (measured with 1Vms @ 1KHz {1MHz for ≤1000pF}) • Dielectric Strength: Minimum 120% of rated WVDC

AVX TurboCap™ — High-CV SMPS Capacitors

The TurboCap, MLC capacitors from AVX are characterized with very high capacitance in a small volume. By vertical stacking of the ceramic elements, the footprint required for mounting the capacitors is greatly reduced. TurboCaps are ideally suited as filters in the input and output stages of switch mode power supplies (SMPS). With their ultra-low ESR, these capacitors are designed to handle high ripple current at high frequencies and high power levels. The DIP leads in either thru-hole or surface mount configurations offer superior stress relief to the ceramic elements. The leads effectively decouple the parts from the board and minimize thermally or mechanically induced stresses encountered during assembly, temperature cycling or other environmental conditions. **Specifications:** Dissipation Factor: 2.5% maximum @ 25°C, 1.0 ±0.2Vrms (open circuit voltage) @ 1kHz

SMPS Stacked MLC Capacitors

SMX Series for High Temperature Applications up to 200°C

SMX-style capacitors, stacked Switch Mode Power Supply Capacitors (SMPS) utilizing Multilayer Ceramic (MLCC) construction, are ideally suited for high temperature applications up to 200°C. This product is intended for downhole oil exploration, including logging while drilling, geophysical probes, as well as space and aerospace electronics. The high temperature solder utilized in the construction of SMX-style parts assures reliable operation in harsh environments. The wide product offering provides designers a solution for high capacitance value and high voltage capacitors rated at 200°C. The SMX-style capacitors are ideally suited for applications as DC filters in high power, high frequency motor drives, high pulsed-current circuitry, as well as low power electronics. SMX-style SMPS capacitors are characterized with excellent performance in comparison to wet tantalum products.

The benefits of SMX-product over wet tantalum capacitors include:

- Much lower ESR and lower losses
- Excellent capacitance retention with frequency
- Excellent high frequency performance
- Low DC leakage current
- Much higher current handling capabilities

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Accu-P® Series — Thin Film RF/Microwave
Multilayer Chip Capacitors

Features: • Low ESR • High Q • Very Low Capacitance Values • Very Tight Capacitance Tolerances • High RF Power Handling Capability • Hand Solderable
Specifications: • Operating Temperature: -55°C ~ 125°C • Insulation Resistance: ≥ 10^{11} Ω (≥ 10^{10} Ω for 0201 and 0402 size) • Dielectric Absorption: .01%

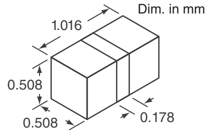
NEW! GX Series Ultra Broad Band Capacitors



The GX Series was developed specifically to address DC blocking issues from ~16KHz (-3dB roll-off) to 40GHz. Most applications will experience resonance-free insertion loss of <0.5dB thru at least 40GHz. Insertion loss at higher frequencies is in part dependent on installation parameters. Using AVX's patented precision thin film termination process, the part is designed to be completely orientation insensitive with a standard EIA 0402 footprint to minimize board space requirements.

Applications: • Semi-Conductor Data Communications • Receiver Optical Sub-Assemblies • Transimpedance Amplifiers • Test Equipment

"U" Series Capacitors are C0G (NP0) chip capacitors specially designed for "Ultra" low ESR for applications in the communications market. Max ESR and effective capacitance are met on each value producing lot to lot uniformity. **Specifications:** • Insulation Resistance: 10^{12} Ω minimum @ 25°C • Operating Temperature: -55°C ~ 125°C

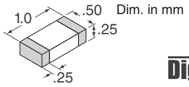
UltraThin Ceramic Capacitor



The UltraThin (UT) series of ceramic capacitors was designed to meet the stringent thickness requirements of our customers. AVX developed a new termination process (FCT - Fine Copper Termination) that provides unbeatable flatness and repeatability. The series includes products <0.35mm in height and is targeted for applications such as Smart cards, memory modules, High Density SIM cards, mobile phones, MP3 players, and embedded solutions.

LT Series Low Profile Multilayer Chip Capacitors

AVX introduces the LT series that is comprised of a range of low profile products in the X5R dielectric. X5R is a Class II dielectric with temperature variation of capacitance within ±15% from -55°C ~ 85°C. Series includes 0402, 0603, 0805 and 1206 packages in compact, low-profile designs. The LT Series is ideal for decoupling and filtering applications where height clearance is limited.

MH Series Ceramic Capacitors – Molded SM Leadframe

The MH Series capacitor is a SMT molded part with a multilayer ceramic insert. MH capacitors combine the ceramic attributes of very low ESR, non-polar construction, excellent high frequency behavior, excellent voltage stress capabilities and wide temperature range with the enhanced mechanical protection of a molded case. The MH range provides a lead-free solution to customers who have previously been unable to use large case ceramic capacitors because of mechanical stress concerns.

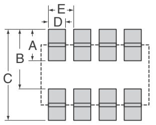
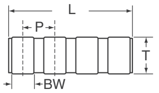
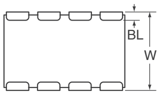
Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

AVX Low Inductance Capacitors 0508/0612 IDC (InterDigitated Capacitors)

Very low equivalent series inductance, surface mountable, high speed decoupling capacitor. Measured inductances of 120pH (for 0612) and 95pH (for 0508) are the lowest in the FR4 mountable device family. Opposing current flow creates opposing magnetic fields. This causes the fields to cancel, effectively reducing the equivalent series inductance. Perfect solution for decoupling high speed microprocessors by allowing the engineers to lower the power delivery inductance of the entire system through the use of eight terminals. Overall reduction in decoupling components due to very low series inductance and high capacitance.







Characteristics:
- Temperature Coefficient: ±15% (OVDC) • Dissipation Factor: 4V and 6.3V=6.5% Maximum, 10V=5.0% Maximum, 16V=3.5% Maximum • Insulation (ppm/C): 12.0 • Thermal Conductivity: 4-5W/M K • Terminations Available: Plated Nickel and Solder • Maximum Thickness: 0.037" (0.95mm) • Operating Temperature: **X7R:** -55°C ~ 125°C, **X5R:** -55°C ~ 85°C

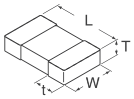
AVX Tip and Ring or ring detector multilayer ceramic chip capacitors are designed as a standard telecom filter to block -48 volts DC telephone line voltage and pass subscriber's AC signal pulse (16 to 25Hz, 70 to 90Vrms). The ringer capacitors replace large leaded film capacitors and are ideal for telecom/modem applications. These capacitors not only save valuable real estate on the board and reduce the weight of the overall product, but they all feature standard surface mounting capabilities that are so critical to new and compact designs.



Specifications:
- Operating Voltage Range: -55°C ~ 125°C • Dielectric Strength: 250% of rated voltage for 5 seconds at 50mA maximum current • Dissipation Factor: 2.5% maximum

LD Series Multilayer Ceramic Chip Capacitors

C0G (NP0) Dielectric: • EIA class I ceramic materials • C0G (NP0) ceramics offer one of the most stable capacitor dielectrics available • Operating temperature range: -55°C ~ 125°C • Capacitance change with temperature is 0 ±30ppm/°C which is less than ±0.3% Δ C from -55°C ~ 125°C
X7R Dielectric: • X7R formulations are called "temperature stable" ceramics and fall into EIA class II materials • Its temperature variation of capacitance is within ±15% from -55°C ~ 125°C • Operating Temperature Range: -55°C ~ 125°C
X5R Dielectric: • General purpose dielectric for ceramic capacitors • EIA Class II dielectric • Temperature variation of capacitance is within ±15% from -55°C ~ 85°C • Operating Temperature Range: -55°C ~ 85°C

Low Inductance Capacitors

The total inductance of a chip capacitor is determined both by its length to width ratio and by the mutual inductance coupling between its electrodes. Thus a 1210 chip size has a lower inductance than a 1206 chip. This design improvement is the basis of AVX's Low Inductance Chip Capacitors (LICC), where the electrodes are terminated on the long side of the chip instead of the short side. The 1206 becomes a 0612, in the same manner, a 0805 becomes a 0508, a 0603 becomes a 0306. This results in a reduction in inductance for the 1nH range found in normal chip capacitors to less tan 0.2nH for LICC's. Their low profile is also ideal for surface mounting (both on the PCB and on the IC package) or inside cavity mounting on the IC itself.
Characteristics: • Operating Temperature Range: X7R: -55°C ~ 125°C, X5R: -55°C ~ 85°C • Temperature Coefficient: ±15% (0VDC) • Dissipation Factor: 10V = 5.0% maximum; 16V = 3.5% maximum; 25V = 3.0% maximum • Insulation Resistance (@ 25°C RVDC): 100,000MΩ minimum or 1,000MΩ per µF whichever is less.

AVX Low Inductance LGA Capacitors

AVX has introduced a revolutionary capacitor for low inductance applications. Low inductance LGA (land grid array) capacitors have virtually the equivalent high frequency performance of 8-terminal IDC's (Inter-Digitated Capacitors) but are built in a simplified 2-terminal package.

This provides for lower manufacturing cost and easier handling and design. LGA's are ideal for decoupling in semiconductor package-level and board-level applications.

Multi-Layer Ceramic Chip Capacitor Arrays

AVX capacitor arrays offer designers the opportunity to lower placement costs, increase assembly line output through lower component count per board, and to reduce real estate requirements. **C0G (NP0) Dielectric:** • EIA Class I ceramic materials • C0G (NP0) ceramics offer one of the most stable capacitor dielectrics available • Capacitance change with temperature is 0 ±30ppm/°C, which is less than ±0.3% Δ C from -55°C ~ 125°C • Operating Temperature Range: -55°C ~ 125°C **X7R Dielectric:** • X7R formulations are called "temperature stable" ceramics and fall into EIA Class II materials • Its temperature variation of capacitance is within ±15% from -55°C ~ 125°C • Operating Temperature Range: -55°C ~ 125°C **X5R Dielectric:** • General purpose dielectric for ceramic capacitors • EIA Class II dielectric • Temperature variation of capacitance is within ±15% from -55°C ~ 85°C • Operating Temperature Range: -55°C ~ 85°C

JOHANSON DIELECTRICS

X2Y® Filter and Decoupling Capacitors

X2Y filter capacitors employ a unique, patented low inductance design featuring two balanced capacitors that are immune to temperature, voltage and aging performance differences. These components offer superior decoupling and EMI filtering performance.

Applications:
- FPGA/ASIC/µ-P Decoupling
- DDR Memory Decoupling
- Amplifier Filter and Decoupling
- High Speed Data Filtering
- Cellular Handsets

MLCC Capacitors

General Purpose, High Voltage and TANCERAM®

High Voltage Applications:
- Analog and Digital Modems • Lighting Ballast Circuits • Voltage Multipliers • DC-DC Converters • LAN/WAN Interface • Back-lighting Inverters

TANCERAM Applications:
- Switching Power Supply Smoothing (Input/Output) • DC/DC Converter Smoothing (Input/Output) • Backlighting Inverters • General Digital Circuits

F

Safety Certified Capacitors – Type SC

Johanson Dielectrics Type SC ceramic chip capacitors are designed for AC voltage surge and lightning protection in line-to-ground interface applications in computer network, modem, facsimile and other equipment. Johanson's safety capacitor offering includes four different case sizes and NP0 and X7R dielectric materials. These devices have barrier terminations and are surface mount ready.

Safety Rating Information:

- **X Capacitors:** Suitable for use in situations when failure of the capacitor would not lead to danger of electric shock
- **Y Capacitors:** Suitable for use in situations when failure of the capacitor could lead to danger of electric shock

Multilayer Ceramic Chip Capacitors

KEMET multilayer ceramic chip capacitors are produced in plants designed specifically for chip capacitor manufacturing. The process features a high degree of mechanization as well as precise controls over raw materials and process conditions. Manufacturing is supplemented by extensive technology, Engineering and Quality Assurance programs. Standard end terminations use a nickel barrier layer and a tin overplate to provide excellent solderability. The 250VDC or Tip & Ring MLCC capacitors are designed and rated for telecommunication ringer circuits where the capacitor is used to block -48 ~ -52VDC of line voltage and pass a 16 ~ 25Hz AC signal pulse of 70 ~ 90Vrms. KEMET's open mode ceramic surface mount capacitor is designed to significantly minimize the probability of a low IR or short circuit condition when forced to failure in a board flex situation. This reduces the potential for causing catastrophic failures.

Please Note: For additional dimensions see data sheet.

† Low Profile ‡ For Tape and Reel part number, change 1-ND to 2-ND ✔ **NEW!**

***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

(Continued)

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

† Low Profile ‡ For Tape and Reel part number, change 1-ND to 2-ND ✔ ***NEW!***

***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

(Continued)

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

† Low Profile ‡ For Tape and Reel part number, change 1-ND to 2-ND ✔ ***NEW!***

***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

(Continued)

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

† Low Profile ‡ For Tape and Reel part number, change 1-ND to 2-ND ✔ ***NEW!***

***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

Capacitor Kits — *RoHS Compliant*

399-5085-ND (Kemet Part No. CER ENG KIT 07) High Capacitance Value Capacitor Kit, 400 total pieces (See Digi-Key website for values included) **$54.00**

399-5086-ND (Kemet Part No. CER ENG KIT 08) High Voltage Capacitor Kit, 400 total pieces (See Digi-Key website for values included) **$54.00**

399-5087-ND (Kemet Part No. CER ENG KIT 09) Open Mode/Fail Safe Capacitor Kit, 200 total pieces (See Digi-Key website for values included) **$54.00**

KEMET CHARGED. NEW! X8L and X8R Dielectric Multilayer Ceramic Chip Capacitors

RoHS COMPLIANT

Digi-Reel®

X8R Series: Ultra Stable X8R Dielectric features a 150°C maximum operating temperature, offering the latest in high temperature dielectric technology and therefore a reliable choice for extreme temperature applications. It offers the same temperature capability as conventional X8R, but without the capacitance loss due to applied DC Voltage. Ultra Stable X8R exhibits no capacitance loss. Product applications include harsh environments such as Down Hole (Oil Exploration), Automotive (Under Hood), Military and Aerospace.

X8L Series: X8L Dielectric offers an operating temperature range from -55°C ~ 150°C with capacitance shift limited to ±15% from -55°C ~ 125°C and +15, -40% from 125°C ~ 150°C. Product applications include harsh environments such as Down Hole (Oil Exploration), Automotive (Under Hood), Military and Aerospace.

Please Note: For additional dimensions see data sheet.

NEW! KPS Series Stacked MLCCs

Digi-Reel®

RoHS COMPLIANT

KPS Series (KEMET Power Solutions) utilizes proprietary lead-frame technology to vertically stack one or two multilayer ceramic chip capacitors (MLCCs) into a single compact surface mount package.

Benefits: • Higher capacitance in the same footprint • Potential board space savings • Advanced protection against thermal and mechanical stress • Provides up to 10mm of board flex capability • Reduces audible, microphonic noise • Extremely low ESR and ESL • Automotive grade (AEC-Q200) under development.

Applications: • Industrial, Automotive, Military, Telecom • Smoothing circuits • DC to DC converters • Power Supplies (input/output filters) • Any application that is subject to high levels of board flexure or temperature cycling

KEMET CHARGED. NEW! High Temperature 200°C Multilayer Ceramic Chip Capacitors

RoHS COMPLIANT

Digi-Reel®

High temperature surface mount C0G MLCCs feature a robust and proprietary base metal dielectric system that offers industry-leading performance relative to capacitance and case size combined with capacitance stability at extreme temperatures up to +200°C. **Features:** • No Piezoelectric Noise • Extremely low ESR and ESL • High Thermal Stability • High Ripple Current Capability • Preferred capacitance solution at line frequencies and into the MHz range • No capacitance change with respect to temperature from -55°C ~ +200°C • No capacitance decay with time. • Non-polar device **Applications:** Typical applications include critical timing, tuning, circuits requiring low loss, circuits with pulse, high current, decoupling, by-pass, filtering, transient voltage suppression, blocking and energy storage for use in extreme environments commonly present in applications such as down-hole exploration, aerospace engine compartments and geophysical probes.
Please Note: For additional dimensions see data sheet.

Tip and Ring Ceramic Chip Capacitors

RoHS COMPLIANT

Digi-Reel®

Kemet's Tip and Ring MLCC capacitors are excellent replacements for high voltage leaded film devices. The smaller footprints save valuable board space which is critical when creating new designs, and the capacitors are able to withstand today's higher lead-free reflow processing temperatures. The ceramic MLCC have excellent high frequency filtering characteristics, low ESR and high temperature reflow capabilities. The 0805 and 1206 sizes are suitable for either reflow or wave soldering. Sizes 1210 and larger should be limited to reflow soldering only.

Fail-Safe Floating Electrode MLCC with Flexible Termination

RoHS COMPLIANT

Digi-Reel®

The FF-CAP incorporates two existing KEMET technologies; Floating Electrode (cascading electrode design) and Flexible Termination. The floating electrode component of these capacitors yields improved voltage and ESD performance over standard designs, and also mitigates the risk of low IR or short circuit failures associated with mechanical flex cracks. The flexible termination component incorporates a measure of flexibility to the capacitor, shifting flex stress away from the ceramic body and into the termination area.

Digi-Reel® Most SMT cutdown parts are available on a **Digi-Reel®**. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See **Digi-Key®** Services on page 2 for additional information.

Open Mode MLCC Capacitors

These Open Mode Ceramic Surface Mount Capacitors are designed to significantly minimize the probability of a low IR or Short Circuit Condition when forced to failure in a board flex situation. This reduces the potential for causing catastrophic failures.

APPLICATIONS: • Input side filtering (power plane/bus) • High current applications (battery line) • Circuits that cannot be fused to open when short circuits occur due to flex cracks

MARKETS: • Automotive: • All applications connected directly to the battery • Conversion to 42V power system Power Conversion: • Raw power input side filtering

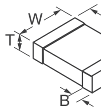
***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

FT-CAP Flexible Terminations MLCC Capacitors

The "Flexible Termination (FT-CAP)" capacitor is a surface mount multi-layer ceramic capacitor that incorporates a unique, flexible termination system that is integrated with standard termination materials.

A conductive silver epoxy is utilized between the conductive metallization and nickel barrier finish in order to establish pliability while maintaining terminal strength, solderability and electrical performance, This technology was developed to address the primary failure mode of MLCC's, flex cracks, which are typically the result of excessive shear stresses produced during board flexure.



Size Code (EIA)	Dimensions - mm

***NOTE*: Parts with improved tolerances or voltages may be substituted within the same case size. These parts will provide performance equal to or better than those which you ordered.**

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Monolithic Ceramic Capacitors

RPE Series

Features:

- Small size and large capacitance
- Low ESR characteristics for high frequency
- Coated with epoxy resin whose flammability is equivalent to UL 94V-0

RDE Series

Features:

- Small size and large capacitance
- Low ESR characteristics for high frequency
- Coated with epoxy resin whose flammability is equivalent to UL 94V-0

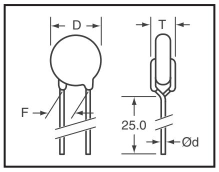
Safety Recognized Ceramic Capacitors

Temperature Characteristics	Capacitance Change	Temperature Range
SL	350 ~ -1000ppm/°C	-20°C ~ 85°C
B	±10% Maximum	-25°C ~ 85°C
E	20, -55% Maximum	-25°C ~ 85°C
F	30, -80% Maximum	-25°C ~ 85°C



Features: • Operating temperature range guaranteed up to 125°C (UL: 85°C) • Rated voltage of 250V • Recognized by UL/CSA/BSI/SEMKO/SEV/VDE/FIMKO/NEMKO/DEMKO and DEMKO/NSW for the KH/KY series • Coated with flame retardant epoxy resin (conforming to UL 94V-0 standards)

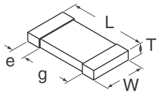
Monolithic Ceramic Chip Capacitors – GJM Series

Size Code	Dimensions – mm			
	L	W	e	g (min.)
0201	0.6±-0.03	0.3±-0.03	0.1 ~ 0.2	0.2
0402	1.0±-0.05	0.5±-0.05	0.15 ~ 0.3	0.4



The Murata GJM Series is a high Q, ultra small capacitor series for high frequency applications in the 500MHz ~ 10GHz range, suitable for VCO and PA Module applications. The GJM Series of capacitors are made with copper electrodes for low ESR and low power consumption due to the high Q (low loss) performance. This series is offered in EIA sizes 0201 and 0402.

Features: • Better Q and low ESR at VHF, UHF and microwave frequencies • Copper inner electrode • Low power consumption, yield ratio improvement due to the better Q or lower ESR • VCO or PA module applications **Operating Temperature Range:** • C0G (NP0): -55°C ~ 125°C

Multilayer Ceramic Chip Capacitor Arrays – GNM Series

Murata's capacitor array offering (GNM Series) includes the following benefits: • Placement cost savings (one placement cycle instead of four or two) • High density mounting due to real estate savings • Capacitor arrays offered in two or four capacitor components

Features: • High density mounting due to mounting space saving • Mounting cost saving
Applications: • General electronic equipment • Cellular phones, pagers, camcorders, personal computers, LCD
Operating Temperature Range: • X7R: -55°C ~ 125°C • X5R: -55°C ~ 85°C

Multilayer Ceramic Chip Capacitors

GRM Series:

The Murata GRM series is a complete line of ceramic chip capacitors with a wide range of voltages and sizes. These capacitors have temperature characteristics ranging from C0G to Z5U. GRM series is offered with a Nickel (Ni) barrier termination plated with Tin (Sn), highly resistant to migration. Stringent dimensional tolerances allow highly reliable, high-speed automatic chip placement on PCBs.

GRM Hi-Cap Series:

The Murata Hi-Cap, Ta replacement product lineup is available with capacitance of 1µF and larger, in voltages of 6.3V ~ 50V. Why use ceramic chips over Ta and Al capacitors? Ceramic chips offer better reliability, electrical performance, no polarity, and allow design engineers to downsize designs with various package options. This line of high volumetric multilayer capacitance ceramic chip capacitors (MLCC) has excellent high frequency noise absorption performance compared to Ta and Al caps. For bypass/decoupling applications, MLCC is equivalent to 1/2 to 1/5 the capacitance value of a Ta capacitor because impedance (ESR) of MLCC is lower at higher frequencies (above 100kHz) Consider Murata Hi-Cap as your Ta capacitor replacement.

Operating Temperature Range:

• C0G (NP0): -55°C ~ 125°C • U2J: 25°C ~ 85°C • X7R: -55°C ~ 125°C • X6S: -55°C ~ 105°C • X5R: -55°C ~ 85°C • Y5V: -30°C ~ 85°C • Z5U: 10°C ~ 85°C

Monolithic Ceramic Capacitors for Automotive GCM Series

Features: • Meets AEC-Q200 requirements • Higher resistance of solder-leaching due to the Ni-barriered termination, applicable for reflow soldering and flow soldering *(0603, 0805 and 1206 only)*

Applications: Automotive electronic equipment power train, safety equipment

Operating Temperature Range: -55°C ~ 125°C

Size Code	Dimensions – mm L	W	E	G min.
0402	1.0	0.5	0.15 ~ 0.3	0.4
0603	1.6	0.8	0.2 ~ 0.5	0.5
0805	2.0	1.25	0.2 ~ 0.7	0.7
1206	3.2	1.6	0.3 ~ 0.8	1.5
1210	3.2	2.5	0.3	1.0

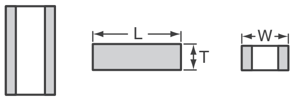
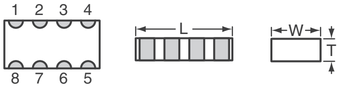
Monolithic Ceramic Chip Capacitors — Low ESL and Low Profile

Murata offers standard and low profile low inductance products. Murata's low ESL capacitors are suitable for high-speed microprocessors and high frequency digital equipment.
Specifications: • Plating: Ni and Matte Sn **• Operating Temperature:** • X6S: -55°C ~ 105°C ±22% • X7R: -55°C ~ 125°C ±15% • X7S: -55°C ~ 125°C ±22%

LLL Series — Reversed Geometry:
Features: • Low inductance • Suitable for noise reduction for high frequency



LLA Series — Eight Terminals:
Features: • Low ESL (100pH) • Suitable to decoupling for 1GHz clock speed ICs



LLM Series — Ten Terminals:
Features: • Low ESL (45pH) • Suitable to decoupling for 2GHz clock speed ICs

Monolithic Ceramic Chip Capacitors Safety Standard

General Features: • New monolithic structure for small, high capacitance capable of operating at high voltage levels • 125°C guaranteed • Only for reflow soldering

GB Series: Features: • Chip monolithic ceramic capacitor (certified as conforming to safety standards) for AC lines • Compared to lead type capacitors, this new capacitor is greatly downsized and low-profiled to 1/10 or less in volume, and 1/4 or less in height. **Applications:** • Ideal for use as X capacitor for various switching power supplies

GD Series: Features: • Available for equipment based on IEC/EN60950 and UL1950 • The low-profile type (thickness: 1.5mm maximum) is available for use on thinner type equipment. **Applications:** • For use on line filters and couplings for DAA modems without transformers • Line filters for information equipment

GF Series: Features: • Available for equipment based on IEC/EN60950 and UL1950. The GA352/355 types are available for equipment based on IEC/EN60065, UL1492 and UL6500 • The low-profile type (thickness: 1.5mm maximum) is available for use on thinner type equipment **Applications:** • For use on line filters and couplings for DAA modems without transformers • Use on line filters for information equipment • Use as Y capacitor or X capacitor for various switching power supplies (GA352/355 types only)

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Monolithic Ceramic Capacitors for High Frequency — ERB Series

Features:
- Negligible inductance is achieved by its monolithic structure so the series can be used at frequencies above 2GHz.
- Nickel barriered termination of ERB series improve solderablitiy and decrease solder leaching
- 0603 and 0805 are designed for both flow and reflow soldering and 1210 are designed for reflow soldering

Applications: High frequency and high-power circuits

Monolithic Ceramic Chip Capacitors

High Frequency GQM Series

Features: • HiQ and low ESR at VHF, UHF, Microwave • Feature improvement, low power consumption for mobile telecommunication (Base station, terminal, etc.)
Applications: • High Frequency circuit (Mobile telecommunication, etc.)

Size Code	Dimensions (mm) L	W	e

TAIYO YUDEN Multilayer Ceramic Chip Capacitors

Features: The use of Nickel (Ni) as material for both the internal and external electrodes improves the solderability and heat resistance characteristics. This almost completely eliminates migration and raises the level of reliability significantly. Low equivalent series resistance (ESR) provides excellent noise absorption characteristics.
Compared to tantalum or aluminum electrolytic capacitors, these ceramic capacitors offer a number of excellent features, including: • Higher permissible ripple current values • Smaller case sizes relative to rated voltage • Improved reliability due to higher insulation resistance and breakdown voltage

Operating Temperature Range: • C0G: -55° ~ 125°C • X7R: -55° ~ 125°C • X5R: -55° ~ 85°C • X5S: -55° ~ 85°C • X6S: -55° ~ 105°C • X7S: -55° ~ 125°C • Y5V: -30° ~ 85°C

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

TAIYO YUDEN Multilayer Ceramic Chip Capacitor Arrays

Features:
Internal electrode is nickel for increased cost performance and reliability

Applications:
Communication Equipment: Mobile Phones, PHS, Cordless Phones, etc.

Operating Temperature Range:
- X7R: -55°C ~ 125°C
- X5R: -55°C ~ 85°C

High Frequency Multilayer Ceramic Chip Capacitors

Features:
Q-values in the high-frequency range (1 GHz+) are excellent compared to other types of multilayer capacitors. The 1005 (0402) case size is designed for high density mounting and weight reduction in various applications.

Operating Temperature Range: -55°C ~ 125°C

Applications:
Suitable for those high-frequency applications in which a capacitor with both a high Q-value and small size is required, such as portable communications and other wireless applications: VCO, TCXO, etc. Adjustment of characteristics in high-frequency circuits.

Super Low Distortion Multilayer Ceramic Capacitors (CFCAP)

Features:

Newly developed dielectric material and the use of nickel for internal electrodes provide excellent temperature characteristics with high capacitance, small case size, and low cost. Low distortion and low shock noise make these capacitors well-suited for use in analog or digital mobile devices. Excellent heat-resistance, high break-down voltage, and mechanical strength make these capacitors well suited for replacing film capacitors.

Applications:

- Signal line for AV products
- Analog signal coupling applications
- PLL circuit of mobile phones
- Good temperature characteristics for time-constant circuits, oscillation circuits and filters

Specifications:

- Operating Temperature: -55°C ~ 125°C

TDK Multilayer Ceramic Chip Capacitors

Features: • High capacitance has been achieved through precision technologies that enable the use of multiple thinner ceramic dielectric layers • Monolithic structure ensures superior mechanical strength and reliability • High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances • Composed of only ceramics and metals, these capacitors provide extremely dependable performance, exhibiting virtually no degradation even when subjected to temperature extremes **Applications:** • Cellular phones • Portable/Handheld devices (PDA's, MP3 players, etc) • RF Modules (VCO, TCXO, PA, etc) **Operating Temperature:** • C0G: -55°C ~ 125°C • X6S: -55°C ~ 105°C • X7R: -55°C ~ 125°C • X7S: -55°C ~ 125°C • X5R: -55°C ~ 85°C • Y5V: -30°C ~ 85°C • X8R: -55°C ~ 150°C • SL: 20°C ~ 85°C

NEW! Kits

445-5404-ND (HI-CV CAP 1001)	High Capacitance 10µF and larger Kit, 18 items x 5 pcs. = 90 pcs. (See Digi-Key website for values included)	**$59.85**
445-5405-ND (HI-CV CAP 1002)	High Capacitance 1µF ~ 10µF Kit, 18 items x 5 pcs. = 90 pcs. (See Digi-Key website for values included)	**$46.55**
445-5406-ND (HI-CV CAP 1003)	High Capacitance, Lower Voltage 6.3V ~ 16V Kit, 20 items x 5 pcs. = 100 pcs. (See Digi-Key website for values included)	**$53.20**
445-5407-ND (HI-CV CAP 1004)	High Capacitance, Higher Voltage 16V ~ 50V Kit, 16 items x 5 pcs. = 80 pcs. (See Digi-Key website for values included)	**$59.85**

CKG Series — 2-Chip Piled Multilayer Ceramic Capacitors

Features:
• No polarity • Twice the capacitance is obtainable on a single capacitor space • Unique construction provides high reliability • Metal caps absorb stress from thermal and mechanical shocks, ensuring excellent performance on aluminum circuit substrates • Low ESR and ESL promises excellent characteristics for high frequency switching power supply

Applications:
- Smoothing circuits, temperature variable applications
- Maintenance free power supplies, DC to DC converters and automotive

Operating Temperature:
- X7R and X7S: -55°C ~ 125°C
- X5R: -55°C ~ 85°C

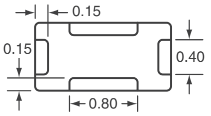
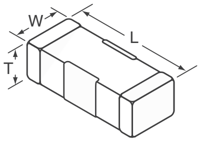
Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

TDK

CKD Series — 3-Terminal Feed Through Multilayer Ceramic Chip Capacitors





Features:

- Small low-cost filters used for meeting EMC requirements • Can be used up to even higher frequencies due to low parasitic inductance • Optimized for use as a noise bypass capacitors for signal and power source circuits

Applications:

- For digital and analog signal line noise bypassing signal line

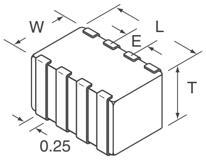
CLL Series — Ultra Low Inductance Multilayer Ceramic Chip Capacitors



Features:

- Unique internal structure that cancels magnetic fields to reduce inductance • Compact and lightweight • Supports lead free soldering

Applications:

- Power supply circuits for CPUs and high speed digital ICs

Multilayer Controlled ESR Ceramic Capacitors

MLCCs with low ESR (High-Q) commonly exist in RF and microwave applications. However, intentionally higher ESR MLCCs rarely exist. In low impedance PDN designs, it is widely known that MLCCs, with adequate impedance, can be a very effective solution.

CKC Series 2-Element Multilayer Ceramic Chip Capacitor Array

Features: • Two capacitors are fitted in a single product, contributing to reduced installation costs • The electrostatic capacity range and shape are designed to meet the demands of the cellular phone market • Reduced crosstalk (signal interference) between the terminals

Applications: • They are suited for circuits that require multiple identical capacitors in a particular area of a board, such as interfaces and high-frequency noise bypass circuits on cellular phones, interfaces including I/O cables on PCs and peripherals, as well as CPU bus lines

Operating Temperatures: • C0G (NP0) and X7R: -55°C ~ 125°C • X5R: -55°C ~ 85°C

CKC Series 4-Element Multilayer Ceramic Chip Capacitor Array

Features: • The CKC Series are integrated, single-chip, 4-element capacitors that are highly effective in EMC countermeasure applications • They are particularly effective when used as a bypass for digital signal line noise, thereby preventing EMC around connectors

Applications: • For use as a bypass for digital and analog signal line noise generated by telecommunications equipment and other common electronic circuits

Operating Temperatures: • C0G (NP0) and X7R: -55°C ~ 125°C • X5R: -55°C ~ 85°C

TDK FD Series Ultra-High Voltage Ceramic Capacitors

Molded from resins that provide outstanding insulation and moisture resistance, these capacitors are ideal for high-voltage power circuits in electrical power transmission and receiving devices. **Features:** • Compact in size • Exhibit excellent low-loss, low-distortion characteristics • Capacitance values are largely unaffected by variations in applied voltage • Internal screw thread design simplifies mounting requirements **Applications:** • High voltage surge absorbers • Gas circuit breakers in electrical power transmission and receiving devices • Lightning arrestors • Voltage distribution elements in high-voltage measuring devices • Impedance matching in transformers and High voltage AC circuits

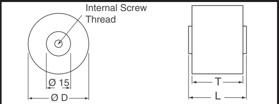
FHV and UHV Series Ultra-High Voltage Ceramic Capacitors



The FHV and UHV series high voltage ceramic capacitors feature low dissipation and excellent voltage-capacitance characteristics using patented strontium titanate for dielectric material. They are epoxy-encapsulated to meet requirements of high voltage applications.
Features: • Small size • Low dissipation factor • Excellent voltage-capacitance characteristics • Screw terminals for easy mounting **Applications:** • High voltage power supplies • Laser equipment **Specifications:** • Operating Temperature Range: -30°C ~ 85°C • Dissipation factor: (tan δ): 0.2% maximum

Ceramic Disk Capacitors — Safety Standard Approved — CD Series — X1Y1

Reinforced Insulation Type Class 2 High Dielectric **Features:** • Smaller than conventional capacitors • Flame resistant reinforced outer insulation prevents fires, electrical shock and other potential hazards • Compliant with the safety standards of 11 countries (conforms to European standards in accordance with IEC Publication 384-14 Version 2) • Meets European Class II (reinforced insulation) Safety Standards VDE, SEV, SEMKO, BS. Since it is rated at a withstand voltage of AC 4000V, it can be used in a single unit configurations with European Class II devices **Temperature Range:** -25°C ~ 105°C

Ultra-High Voltage Ceramic Capacitors

Applications: High voltage surge absorber, gas circuit breaker in electric power transmitter and receiver devices, lightening arresters. Improve the voltage distribution of high voltage bushings, etc. Also for voltage distribution elements for the high voltage measuring devices. For impedance adjustment of a transformers and high voltage AC circuits.

Dipped Radial Ceramic Capacitors

— FK Series

Features: Leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability.

UNITED CHEMI-CON

KTJ Series Stacked Multilayer Ceramic Capacitors

Digi-Reel® RoHS COMPLIANT

Features: • Small size and large capacitance • High ripple current • Excellent noise absorption
Applications: • Smoothing circuit of switch mode AC-DC or DC-DC converter • On-board power supply • Noise suppressor for various kinds of equipment
Specifications: • Dielectric: X7R • Ripple Current: 3.0Arms (10KHz ~ 1MHz sine curve) • Ripple voltage must be less than the rated voltage

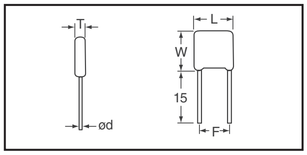
UNITED CHEMI-CON

High Capacitance Dipped Radial Leaded Multilayer Ceramic Capacitors



Features: • Small size and large capacitance • High ripple current • Y5U temperature characteristic • Excellent noise absorption • Superior humidity characteristic • Long life • Resin (UL94V-0) used for coating

Applications: • Automotive equipment • Smoothing circuit of switching mode AC-DC or DC-DC converter • Noise suppressor for various kinds of equipment • By-pass or decoupling circuits

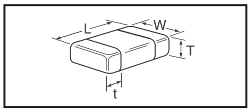
VISHAY Vitramon

Multilayer Ceramic Chip Capacitors - Prohibits Surface Arc-over in High Voltage Applications - VJ HVArc Guard™ Series



Features: • Protects against surface arc-over • Higher capacitance and smaller case size that save board space • Voltage breakdowns are twice that of some competitor products • Excellent reliability and high voltage performance

Applications: • DC-to-DC converters (Buck and Boost) • Voltage multipliers for flyback converters • Lighting ballast circuits • Power supplies

Electrical Specifications: • Temperature Coefficient of Capacitance: • **X7R:** ≤15% from -55°C ~ 125°C, with 0 Vdc applied • **C0G (NP0):** 0 ±30ppm/°C from -55°C ~ 125°C

Multilayer Ceramic Chip Capacitors - for Boardflex Sensitive Applications - VJ OMD Series

Features: • OMD-Cap (Open Mode Design) reduce the risk of short or low IR because of board flex cracks • Efficient low-power consumption, ripple current capable to 1.2 Arms at 100kHz • High Voltage breakdown compared to standard design • Excellent reliability and thermal shock performance • Polymer terminations, which increase resistance to board flex cracking as much as 50%

Applications: • Buck and Boost DC-to-DC converters • Voltage multipliers for flyback converters • Lighting ballast circuits • High frequency filtering for switching power supplies

Electrical Specifications: • Temperature Coefficient of Capacitance: • **X7R:** ±15% from -55°C ~ 125°C, with 0 Vdc applied • **C0G (NP0):** 0 ±30ppm/°C from -55°C ~ 125°C

VISHAY **Vitramon**

Robust Large Case High Voltage Multilayer Ceramic Chip Capacitors - VJ X7R and COG Series

Features:

X7R: • General purpose dielectric • Excellent aging characteristics • Ideal for decoupling and filtering • Surface mount, precious metal technology, wet build process

COG: • Ultra-stable dielectric • Low Dissipation Factor (DF) • Ideal for critical timing and tuning applications • Surface mount, precious metal technology, wet build process

Electrical Specifications:

X7R: • Operating Temperature: -55°C ~ 125°C • Temperature Coefficient of Capacitance (TCC): ±15% from -55°C ~ 125°C, with 0 Vdc applied • Dissipation Factor (DF): ≤25V ratings: 3.5% maximum at 1.0V_{rms} and 1kHz, >25V ratings: 2.5% maximum at 1.0V_{rms} and 1 kHz

COG: • Operating Temperature: -55°C ~ 125°C • Temperature Coefficient of Capacitance (TCC): 0 ±30 ppm/°C from -55°C ~ 125°C • Dissipation Factor (DF): 0.1% maximum at 1.0V_{rms} and 1kHz for values >1000 pF, 0.1% maximum at 1.0V_{rms} and 1MHz for values ≤1000 pF

Applications:

X7R and COG: • High voltage • Decoupling • Filtering • Surge Suppression

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

VISHAY Vitramon

NEW! Surface Mount Multilayer Ceramic Chip Capacitors for Non-Magnetic Applications

RoHS COMPLIANT

Digi-Reel®

Features: • Manufactured with non-magnetic materials • Safety screened for magnetic properties • Reliable Noble Metal Electrode (NME) system • Halogen-free according to IEC 61249-2-21 definition

Applications: • Magnetic Resonance Imaging (MRI) • Medical test and diagnostic equipment • Aviation systems • Laboratory analysis systems • Navigation and electronic test equipment • Audio amplifiers

X2Y® Series Surface Mount Ceramic EMI Filter Capacitors

Features: • Broadband Filtering and Decoupling: Effective up to 10 GHz and frequencies beyond • Ultra Low ESL: Noise cancellation makes ESL reduce from nanohenry to picohenry levels • Bypass: Unlike feedthrough capacitors, X2Y is in bypass, so no DC current limitations • Matched Y-caps: Two tightly matched line to ground capacitors in one device • Superior Balance: Temperature and voltage variations balanced of two Y-caps • Aging Reliability: Aging effects are equal on two Y-caps **Benefits:** • Fewer Component in Filtering: Can replace multiple inductors and/or capacitors • Superior Performance in Filtering: Can eliminate both differential and common mode noises • Fewer Component in Decoupling: Up to 1:7 replacement of MLCC in power delivering system bypass networks • Superior Performance in Decoupling: Large or small, X2Y components exhibit ultra low ESL • Total Cost Savings: Assembly cost savings through reduced component count and placement costs • Board Level Design Advantages: Dramatically reduces via drills, which blocks routing **Applications:** • EMI filtering on DC motors • Filtered connectors (airbag connectors, RJ-45 connectors) • High speed data-line filtering • Decoupling of supply-lines in high speed digital circuits • Broadband filtering • Amplifier decoupling and EMI suppression • IC Decoupling, on-package, on PCB • DC power line filtering • Data line filtering • EMI suppression for DC motors • Sensors • Audio

CDE CORNELL DUBILIER

MC Series Multilayer SMT Mica RF Capacitors

Type MC capacitors are the answer for high frequency public-service and military radio communication, flight radio and cable television. The natural mica dielectric retains its high-Q to many megahertz, so higher frequency applications are limited by the circuit inductance-not the type MC capacitor. FR4 compatibility and natural robustness offer freedom from the thermal cracking found with other RF capacitors.

Features: • Ultra stable-no change in capacitance with frequency, voltage or temperature • Free from thermal cracking • High RF Current dV/dt 20,000 V/us • Very high Q • Very low ESL and ESR • Wave Solderable

Specifications: Temperature Range: -55°C ~ 125°C with no voltage derating

Applications: • MRI RF coils • RF Instruments and Communications • 2-way mobile radio • Tuned circuits • CATV • Plasma generators for medical and IC manufacturing

MIN and MCM Series Multilayer RF Clad Capacitors

Types MCM and MIN metal clad PTFE and mica capacitors are top performers for high power applications requiring low inductance at high frequencies.

Features: • 200°C rated with no voltage derating • Low ESR for RF power applications • Nonmagnetic for minimal RF loss • High frequency operation into the GHz range • Very low ESL for excellent bypass action • Ultra-low dielectric absorption for ≤32pF • Ultra stable: no change with temperature, voltage and frequency

Specifications: • Temperature Range: -55°C ~ 200°C with no voltage derating • Dielectric Strength: 200% of rated voltage for 5 seconds • Insulation Resistance: 1,000MΩ/µF Need not exceed 100,000MΩ at 25°C • Typical Q's: >2,000

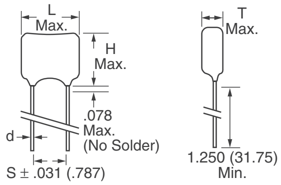
CDE CORNELL DUBILIER

Multilayer RF MICA Capacitors — Radial Lead



Cornell Dubilier mica capacitors are made of pure India Ruby muscovite mica. It is among the most inert and stable materials in the universe. When used as the insulator (dielectric) in a capacitor, the result is an electronic component with the ultimate in stability and reliability.

The capacitance change from zero to full rated operating voltage is generally less than ±0.1%. The series inductance of these capacitors is as little as eight nanohenrys (nH). The stability characteristics also apply to frequency which is why mica capacitors are so useful throughout the RF frequency range.

Mica capacitors are so efficient that less than 0.05% of the applied volt-amperes is lost as heat. Dipped silver mica capacitors such as the Standard Types are manufactured by applying pure silver to ultra-thin mica plates. The plates are stacked and secured by brass clips with copper-clad steel leads welded to each clip. The extra mass of the metal acts as a heat sink and enables these capacitors to absorb voltage transients up to 100,000 volts per microsecond.

Specifications:

Capacitance Tolerance: • Manufacturer's part number letter: D03 = ±1/2 pF • Manufacturer's part number letter: J03 = ±5% • Manufacturer's part number letter: F03 = ±1% **Temperature Range:** -55°C ~ 125°C

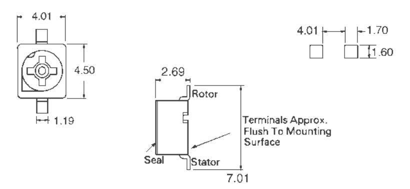
SURFTRIM® Surface Mount Variable Capacitors

• Sealed Construction • 4 x 4.5 x 2.7mm



Features: • Process seal provides protection against contaminants (flux, solvents, etc.) during production. • Designed for vapor phase reflow soldering. **Specifications:** • Operating Temperature Range: -25°C ~ 85°C • Dielectric Withstanding Voltage: 220VDC • Insulation Resistance: 10^4MΩ minimum • Voltage Rating: 100VDC • Torque: 15 to 100 g-cm (0.2 to 1.39 in.-oz.)

SPRAGUE GOODMAN

Ceramic Dielectric Trimmer Capacitors

SURFTRIM® Surface Mount — GKRP, GKYB and GKY Series

Tuning Tool

GTT-21-ND	(SG2026 - SG2029)	**$40.00**
GTT-11-ND	(SG2026 - SG2029)	**$5.52**
GTT-9-ND	(SG9013 - SG9028)	**$5.52**

GKRP SERIES: • Sealed for washability • Low mounting profile • Carrier and reel packaging standard • NPO temperature coefficient (up to 10pF maximum) • Self resonant frequency above 1GHz **Specifications:** • Operating Temperature Range: -40°C ~ 85°C • Dielectric Withstanding Voltage: 75VDC • Insulation Resistance: 10^4MΩ minimum • Voltage Rating: 25VDC • Torque: 0.14 ~ 2.1 oz-in

GKYB SERIES: • Suitable for reflow soldering • Low mounting profile (only 1.6mm) • Superior setting drift performance **Specifications:** • Operating Temperature Range: -25°C ~ 85°C • Voltage Rating: 100VDC • Dielectric Withstanding Voltage: 220VDC • Insulation Resistance: 10^4MΩ minimum • Torque: 25 ~ 100 g-cm (0.35 ~ 1.39 oz-in)

GKYxxx46 SERIES: • Designed for reflow soldering • Setting drift within 1% • Mounting profile 0.0591"/1.5 maximum • Dust resistant design • Self resonant frequency above 1GHz
Specifications: • Operating Temperature Range: -25°C ~ 85°C • Insulation Resistance: 10^4MΩ minimum • Torque: 10 ~ 72 g-sm (0.14 ~ 1.0 oz-in)

GKYxxx56 SERIES: • Suitable for reflow soldering • Superior setting drift performance • Low mounting profile (only 1.45mm) • Carrier and reel packaging • Dust resistant design
Specifications: • Operating Temperature Range: -25°C ~ 85°C • Insulation Resistance: 10^4MΩ minimum • Torque: 10 ~ 72 g-sm (0.14 ~ 1.0 oz-in)

Top and Bottom/Side Adjust FILMTRIM® Plastic Dielectric Capacitors

GYA, GYB Series — 8mm; GYC, GYD, GZC, GZD Series — 10mm

Tuning Tool

SG9004-ND **$15.44**

Features: • Compact size • Most stable TCC for single turn trimmers • Low cost for commercial/industrial applications • Linear capacitance change vs. rotation **Specifications:** • Dielectric Construction: GYA, GYB, GYC, GYD Series: Polypropylene; GZC and GZD Series: Polycarbonate • Voltage Rating: 100WVDC • Dielectric Withstanding Voltage: 200VDC • Operating Temperature: GYA and GYB Series: -40°C ~ 70°C; GYC, GYD, GZC, GZD Series: -40°C ~ 85°C • Contact Resistance: <0.010 Ohm • Insulation Resistance: >10,000MΩ • Torque: GYA and GYB Series: 0.2-3.0 in.-oz.; GYC, GYD, GZC, GZD Series: 0.2-5.5 in.-oz. • Q (minimum) @ 1MHz: GYA, GYB, GYC, GYD Series: 1000; GZC and GZD Series: 200

SGC3 Series Chip Trimmer Capacitors

Features:
• Ultra miniature size • Constructed with high temperature liquid-crystal polymer for superior durability and low dielectric loss • Designed for reflow soldering • Color coded for easy identification • Mountable by an automatic placer • Easy adjustment using a conventional screwdriver **Specifications:** • Insulation Resistance: 10^4 MΩ Min • Torque: 0.14 ~ 1.0 oz-in. • Operating Temperature: -25°C ~ 85°C

Ceramic Trimmer Capacitors – TZ03 Series

Dim. in mm

Color coded case facilitates identification of capacitance range. Sealed construction prevents the penetration of flux and dust. Cross shaped slot enables automatic adjustment.

Specifications:

- Insulation Resistance: 10,000MΩ minimum
- Torque: 2.0 ~ 15.0mNm
- Operating Temperature Range: -25°C ~ 85°C

SMD Ceramic Trimmer Capacitors – TZY2 Series

New shape of cover can improve the flux invasion compared with current products. Improvement of the adhesion between rotor and stator leads superior stability. Unique construction with no plastic material provides superior soldering heat resistance to maintain excellent characteristic performance after reflow soldering.

Specifications:

• Insulation Resistance: 10,000MΩ minimum • Torque: 0.5-5.0mNm • Operating Temperature Range: -25°C ~ 85°C

SMD Ceramic Trimmer Capacitors – TZC3 Series

Color coded stator permits easy identification of capacitance and reduces mounting errors. Can be adjusted with conventional adjustment tools having a thickness of 0.5mm. Designed for automatic placement in surface mount applications. Heat resistant resin withstands reflow soldering temperatures. **Specifications:** • Insulation Resistance: 10,000MΩ minimum • Torque: 1.5-10.0mNm • Operating Temperature Range: -25°C ~ 85°C

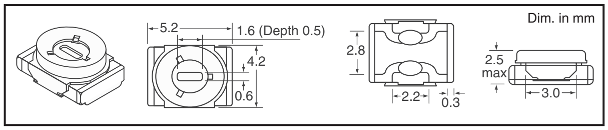
Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Ceramic Trimmer Capacitors –TZW4 Series



Features: • Extremely high self resonant frequency (more than 3GHz @ 1.5pF setting) • Typical application: Impedance matching for Cellular Base Station • Available for pick and place machine. Possible thinner design due to 2.5mm low profile

SMD Ceramic Trimmer Capacitors – TZB4 Series

Fig. 1

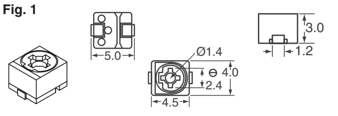

Fig. 2

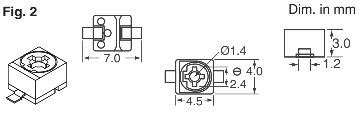

Color coded case facilitates identification of capacitance range. Designed for automatic placement in surface mount applications. Can be temporarily attached to PCB with adhesives. **Specifications:** • Insulation Resistance: 10,000MΩ minimum • Torque: 1.5-10.0mNm • Operating Temperature Range: -25°C ~ 85°C

Trimmer Capacitors – CTZ3 Series

Features: • SMD • Small and thin package • Wide capacitance range • Plus slot (+) suitable for auto-adjustment **Applications:** • AV equipment • Cellular phone • Cordless phone • TCXO • Keyless entry

Specifications: • Rated voltage: 25VDC • Operating Temperature Range: -40°C ~ 85°C • Insulation Resistance: ≥10^4MΩ • Torque: 10 ~ 150g.cm

Thin Film Fixed SMD Attenuators

PAT0510S and PAT1220 Series

Specifications:

• Attenuation: 0 ~ 10dB • VSWR: 1.3 or less • Frequency Range: DC ~ 10GHz • Operating Temperature: -55°C ~ 125°C • Impedance: 50Ω • Rated Ambient Temperature: 70°

Materials:

• Resistor: Nichrome Thin Film • Protection Film: Epoxy Resin • Substrate: Alumina • Marking: White Ink • Terminals: Sn Plate (Sn is free from lead)

0402 / 0603 / 0805 SMD 1% High Power Thin Film Chip Resistors

RP Series — 1/3, 1/5, 1/6 Watt

Susumu's RP series current sensing resistors provide excellent heat dissipation which allows higher power handling in smaller package sizes. Their patented structure will not create "hot spots" and evenly distribute heat across the total surface area of the resistor.

Operating Temperature: -40°C ~ 125°C
Maximum Operating Voltage: $\sqrt{PxR}$

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

0402 / 0603 / 0805 / 1206 SMD 0.02%, 0.05%, 0.1%, 0.5% Thin Film Chip Resistors

Ultra Precision / Ultra Reliable — RG Series: 1/16, 1/10, 1/8 and 1/4W; RGH Series: 1/6 and 1/4W

Using the conventional properties of Thin Film Resistors, SSM has successfully achieved the environmental, resistance stability and sustained durability issues that are encountered while operating at higher temperatures. We call this "RG" and "RGH" Series (Resistor Great). Higher reliability parts are indispensable in the Automotive, Measurement and Medical Industries as quality requirements increase. Susumu provides a solution with the RG and RGH Series thin film chip resistors. The RG and RGH Series provide excellent TCR, Low Current Noise and Linearity specifications needed in high frequency applications. Tight tolerance allows for circuit simplification and the elimination of trim pots which leads to cost savings.

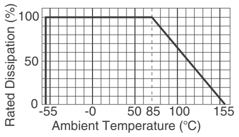
SPECIFICATIONS:

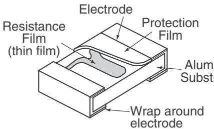
Performance: Inorganic protective coating assures high reliability, durability and protection against heat and moisture.

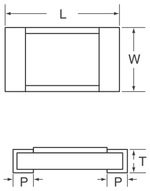
Operating Temperature: -55°C ~ 155°C (RG Series: 100% Power @ 85°C; RGH Series: 100% Power @ 70°C)

Thermal Derating: The RG Series is able to dissipate 100% of rated power @ 85°C; RGH Series @ 70°C. For applications operating above 85°C, the user must derate the resistors in accordance with the derating curve listed.

Applications: Suitable for automotive, measurement devices and any application where accuracy and reliability are required.







Current Noise Comparison
Thin Film vs. Thick Film
Why Thin Film Resistors have lower current noise specifications

Resistance material of Thin Film	Resistance material of Thick Film
Ni-Cr Alloy	Metal and Insulator Composite
Current flow is	Current flow is
Practically even	**Not even**

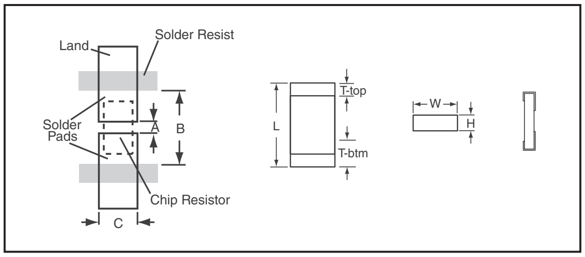
CPA Series High Power Thin Film Resistors
2512 Package — 16 Watt

These power resistors are designed to tolerate high current and establish a low thermal resistance interface with the circuit board. A lower thermal resistance more efficiently sinks heat to the board enabling a larger effective area for heat dissipation. As a result, the CPA Series exhibits much lower surface temperatures when compared to standard chip resistors of the same size with the same applied power.



1%, 2512 Series, ±50, 16W — Resistor Values

3.3	5.6	10.0	18.0
3.9	6.8	12.0	
4.7	8.2	15.0	

1%, 2512 Series, ±25, 16W — Resistor Values

22.0	39.0	68.0	120
27.0	47.0	82.0	
33.0	56.0	100	

Note: Dependent on effective thermal conductivity/resistance of board construction/land design and size of board - greater power capability for board/land with lower thermal resistance. For relatively high thermal resistance mountings, the power resistors are capable of generating sufficient heat to reflow solder bonds without device damage.

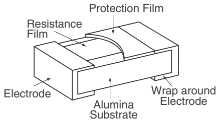
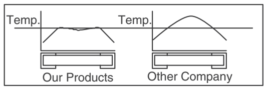
SUSUMU
THIN FILM TECHNOLOGY

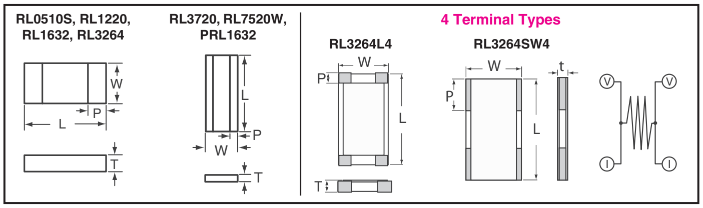
Thin Film Low Resistance Chip Resistors

0402/0805/0815/0830/1206/2512 SMD, 1%, 2% and 5% – 1/8, 1/4, 1/2, 1 and 2 Watt

Digi-Reel®







Susumu's Thin Film Low Resistance series current sensing resistors provide excellent heat dissipation which allows higher power handling in smaller package sizes. Their patented structure will not create "hot spots" and evenly distribute heat across the total surface area of the resistor. A specially designed construction assures small dimensions and repressed surface temperature increase due to heat radiation and thermal conduction. This construction also minimizes the thermal effects on peripheral areas. Patent 2963671.

1%, 2% and 5% SMD Resistors — Digi-Key® Assortment Kits

RoHS COMPLIANT

Digi-Key® 1%, 0805, 1/4W, RL Series, SMD Chip Resistor Kit
RL1220SF-1-KIT-ND 10 each of values .10Ω ~ 10.0Ω **$19.95**

Digi-Key® 2%, 0805, 1/4W, RL Series, SMD Chip Resistor Kit
RL1220SG-1-KIT-ND 10 each of values .022Ω ~ 10.0Ω **$15.95**

Digi-Key® 1%, 2% and 5%, 0805, 1/4W, RL Series, SMD Thin Film Resistor Kit
SSM1220-KIT-ND 40 each of 31 values ▲ **$123.78**

Digi-Key® 1%, 0815, 1W, RL Series, SMD Thin Film Resistor Kit
SSM3720W-KIT-ND 30 each of 20 values ▲ **$102.80**

Digi-Key® 1%, 2% and 5%, 0830, 2W, RL Series, SMD Thin Film Resistor Kit
SSM7520W-KIT-ND 30 each of 16 values ▲ **$144.76**

▲ Please see Digi-Key website for a complete list of values included in the kits.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

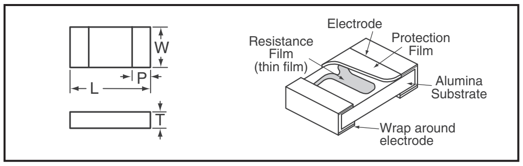
SSM SUSUMU
THIN FILM TECHNOLOGY

0201 / 0402 / 0603 / 0805 SMD .1% and .5% Thin Film Chip Resistors – High Precision RR Series - 1/10, 1/16, 1/20 Watt

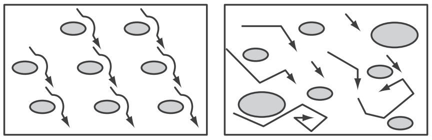
Susumu has been manufacturing thin film resistors since 1986 and is the primary thin film supplier in the world. Susumu's Number One status in thin film resistors can be attributed to the sales of the RR Series thin film chip resistors.

The RR Series offers excellent TCR tolerances, Linearity specifications and low current noise.

These specifications contribute to circuit simplification and cost savings, as they eliminate the need for trimmer pots in the circuit for adjustment.



Current Noise Comparison
RR Series Thin Film vs. Thick Film
Why RR Series has lower current noise specifications



Resistance material of RR Series
Ni-Cr Alloy
Current flow is
Practically even

Resistance material of Thick Film
Metal and Insulator Composite
Current flow is
Not even

VISHAY Thin Film — High Frequency Surface Mount Thin Film Chip Resistors (up to 20GHz) — FC Series

FC Series Chip Resistors are designed with low internal reactance. They function as almost pure resistors on a very high range of frequencies. The specialized laser edge trimming allows for precision tolerances of 0.1%.

FEATURES: • Excellent frequency response up to 20GHz • Edge-trimmed block resistors • Small internal reactance (<10mΩ) • Low TCR of ±25ppm/°C

APPLICATIONS: • Low-noise amplifiers • High-speed routers • Attenuation circuitry • High-frequency line termination

SPECIFICATIONS: • TCR: 25ppm/°C • Tolerance: ±0.1% • Stability: 500ppm; 2,000h @70°C • Operating Temperature Range: -55°C ~ 125°C • Resistive Element: Passivated Nichrome • Substrate Material: High Purity Alumina (99.6%)

NEW! Precision Automotive Thin Film Chip Resistors, AEC-Q200 Qualified, 2kV ESD Rating — PAT Series

These chip resistors are available in wraparound termination styles in 12 case sizes.

They incorporate self passivated enhanced tantalum nitride resistor film to give superior performance on moisture resistance, electrostatic discharge, voltage coefficient, power handling and resistance stability.

The terminations consist of an adhesion layer, a leach resistant nickel barrier, and solder coating (lead (Pb)-free). This product will out-perform all requirements of AEC-Q200.

FEATURES: • Moisture resistant to MIL-STD-202, method 202 • Laser-trimmed tolerances to ±0.1% • Load life stability < 0.05% @1,000h @70°C • Very low noise and voltage coefficient (< -30dB, < 0.1ppm/V)

SPECIFICATIONS: • TCR: 25ppm/°C • Stability: ±0.05% • Operating Temperature Range: -55°C ~ 150°C

VISHAY Thin Film NEW! Precision Low TCR Thin Film Chip Resistors ±5 ppm/°C TCR, 0.05% Tolerance

These precision thin film wraparound resistors are ideal for precision applications requiring low noise, stability, ultra low temperature coefficient of resistance, and low voltage coefficient. **FEATURES:** • TCR of ±5 ppm/°C standard • Anti corrosion resistant film with (SPM) special passivation method • Stable film and performance characteristics (500 ppm at 70°C, 10,000 h) • Very low noise and voltage coefficient (< -30dB, 0.1 ppm/V) • UL 94 V-0 flame resistant • Halogen-free according to IEC 61249-2-21 definition **SPECIFICATIONS:** • Material: Passivated nichrome • Absolute TCR: ±5 ppm/°C at -55°C ~ 125°C • Absolute tolerance: ±0.05% at 25°C • Voltage Coefficient: ±0.1 ppm/V typical • Operating temperature: -55°C ~ 125°C • Noise: < -35dB typical • Termination: Wraparound lead (Pb)-free solder 96.5% Sn/3.0% Ag/0.5% Cu

NEW! Precision Thin Film Non-Magnetic Chip Resistors

These devices eliminate materials that would disturb magnetic fields applications such as in MRI magnetic resonance imaging machines. The PNM series chip resistor has been carefully engineered with non-magnetic materials to eliminate the effects of these stray magnetic fields on circuit performance, thereby resulting in simplified shielding requirements and improved sound quality in audio applications. Providing signal conditioning without distortion from magnetic fields. **FEATURES:** • Non-magnetic • Moisture resistant • High purity alumina substrate • Will pass 85°C, 85% relative humidity and 10% rated power • 100% visual inspected per MIL-PRF-55342 • Very low noise and voltage coefficient (< -30dB) • Non-inductive • Wraparound resistance less than 10mΩ • Halogen-free according to IEC 61249-2-21 definition available **SPECIFICATIONS:** • Material: Tantalum nitride • Absolute TCR: ±25ppm/°C at -55°C ~ 125°C • Absolute Tolerance: ±0.1% at 25°C • Operating Temperature: -55°C ~ 125°C • Noise: < -25dB • Termination: Wraparound lead (Pb)-free solder 96.5% Sn/3.0% Ag/0.5% Cu

VISHAY Beyschlag NEW! Precision and Professional Automotive Thin Film Chip Resistors

FEATURES: • Superior moisture resistivity, < 0.5% (85°C, 85% RH; 1,000h) Rated Dissipation P70 and P85• AEC-Q200 qualified • Approved according to EN 140401-801 • Lead (Pb)-free solder contacts • Compliant with RoHS directive 2002/95/EC **APPLICATIONS:** • Automotive • Telecommunication • Medical equipment • Industrial equipment

NEW! High Pulse Load MELF Resistors

CMA 0204 and CMA 0207 specialty MELF resistors with advanced pulse load capability are the perfect choice for the protection of circuitry with signal or mains input lines from surge pulses. The resistors are also suitable for circuits exposed to high levels of electromagnetic interference or electrostatic discharge. **FEATURES:** • Special carbon film technology • Up to 4 kV single pulse capability for 0204 Series, and up to 10 kV or 17 kW single pulse capability for 0207 Series • Up to 70W continuous pulse load for 0204 Series and up to tbf. continuous pulse load capability for 0207 Series • ESD capability: 6 kV (0204 Series), 16 Kv (0207 Series), Human Body Model • Compatible with lead (Pb)-free and lead containing soldering processes 0207 Series is approved to the safety requirements of IEC 60065, 14.1a (= VDE 0860, 14.1a) VDE-REG.-Nr. B583 **APPLICATIONS:** • Automotive • Telecommunications • Industrial • Medical equipment **SPECIFICATIONS:** • Film temperature: 155°C • Failure rate: ≤ 1 x $10^{-9/h}$

NEW! Professional MELF Resistors - MMU 0102, MMA 0204, MMB 0207 Series

These resistors are the perfect choice for most fields of modern professional electronics where reliability and stability is of major concern. **FEATURES:** • Approved according to EN 140401-803 • Advanced thin film technology • Excellent overall stability; exceeds Class 0.25 • Force fitted steel caps, tin plated on nickel barrier • Pure Sn termination on Ni barrier layer • Compatible with lead (Pb)-free and lead containing soldering processes **APPLICATIONS:** • Automotive • Telecommunications • Industrial • Medical equipment SPECIFICATIONS: • Resistance tolerance: ±1% • Temperature coefficient: ±50 ppm/K • Film temperature: 155°C

NEW! Surface Mount 0.1% High Precision Thin Film Flat Chip Resistors - TNPU Series

TNPU e3 High Precision Thin Film Flat Chip Resistors combine the proven reliability of TNPW e3 products with a most advanced level of precision and stability. This unique combination makes the product perfectly suited for all applications with outstanding requirements towards size, reliable precision and stability.

Features: • Low temperature coefficient and tight tolerances • Superior moisture resistivity ≤0.25% • Waste gas resistant

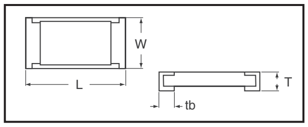
Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

VISHAY. **Dale**

Surface Mount, 1% Thick-Film Chip Resistors

CRCW Series 0201 / 0402 / 0603 / 0805 / 1206 / 1210 / 2010 / 2512

Digi-Reel® RoHS COMPLIANT



Features:

• High volume product suitable for commercial and special applications • Excellent stability (Δ *R/R* ≤ 1% for 1000 h at 70°C) • Lead (Pb)-free solder contacts on Ni barrier layer • Pure tin plating provides compatibility with lead (Pb)-free and lead containing soldering processes • Metal glaze on high quality ceramic • Protective overglaze

Specifications:

• Insulation Resistance: >10⁹Ω • Category Temperature Range: -55°C ~ 155°C

VISHAY Dale

NEW! Pulse Proof, 1% High Power Thick-Film Chip Resistors

CRCW Series 0402 / 0603 / 0805 / 1206 / 2010 / 2512

Features:
• Excellent pulse load capability • Enhanced power rating • Double side printed resistor element • Protective overglaze • Halogen-free according to IEC 61249-2-21 definition • AEC-Q200 qualified, rev. C compliant

Specifications:
• Insulation Resistance: >$10^9\Omega$ • Category Temperature Range: -55°C ~ 155°C

NEW! Wraparound, 1% Extremely Low Value Thick-Film Chip Resistors

RCWE Series 0402 / 0603 / 0805 / 1206 / 1210 / 2010 / 2512

Features:

- Suitable for current sensing and shunts
- Metal glaze on high quality ceramic
- Protective overglaze
- Halogen-free according to IEC 61249-2-21 definition

G

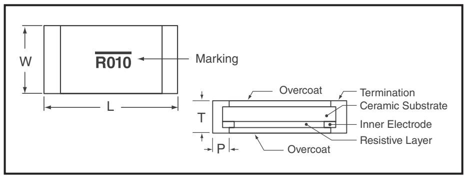
NEW! PF Series Current Sense Low TCR SMT Chip Resistors

PF and PF-Power Enhancement Series low-resistance current sensors are designed for mini-portable devices and power applications. Yageo's PF current sensor series has a resistance range from 6 ~ 33mΩ in 1% and 5%, a temperature coefficient of 100ppm/°C, and a range of package sizes: 1206 and 2512. It is available in regular and power enhancement wattage levels and is particularly suitable for use in the power management circuit of high-end mobile devices, miniature portable electronics, storage devices, Netbooks and Notebooks.



Series	Power Rating @ 70°	Dimensions - mm				Tolerance Rating	Temperature Coefficient
		L	W	T	P		
PF1206	1/2 Watt	3.20	1.60	0.60	0.65	±1%	±100ppm/°C

NEW! PR Series Ultra Low Resistance Current Sense SMT Chip Resistors

PR2512 Series resistors are ultra-low resistance current sensors designed for mini portable device applications. Featuring a comprehensive resistance range of 1 ~ 5mΩ and temperature coefficient of 100ppm/°C and 200ppm/°C, the composition of the resistive material is adjusted to give the approximate required resistance and is covered with a protective coating.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Surface Mount Thin Film Chip Resistors

Description:
The resistors are constructed out of a high-grade ceramic body. Internal metal electrodes are added at each end and connected by a resistive material. The composition of the resistive material is adjusted to give the approximate required resistance and laser cutting of this resistive layer that achieves tolerance trims the value. The resistive layer is covered with a protective coat and printed with the resistance value. Finally, the two external terminations (matte tin) are added.

Surface Mount 1% & 5% Thick Film Chip Resistors

Description: The resistors are constructed on a high grade ceramic body (aluminum oxide). Internal metal electrodes are added at each end and connected by a resistive paste which is applied to the top surface of the substrate. The composition of the paste is adjusted to give the approximate resistance required and the value is trimmed to within tolerance, by laser cutting of the resistive layer. The resistive layer is covered with a protective coat. Finally, the two external end terminations are added. For ease of soldering the outer layer of these end terminations is a lead/tin alloy. End terminations on RoHS Compliant parts are pure tin.

Panasonic® 1% Chip Resistors

Digi-Key® Assortment Kits

Digi-Key® 0402 1% Chip Resistor Kits

RSM1L-ND	50 each of Values 10.0Ω ~ 97.6Ω	**$189.00**
RSM2L-ND	50 each of Values 100Ω ~ 976Ω	**$189.00**
RSM3L-ND	50 each of Values 1.00KΩ ~ 9.76KΩ	**$189.00**
RSM4L-ND	50 each of Values 10.0KΩ ~ 97.6KΩ	**$189.00**
RSM5L-ND	50 each of Values 100KΩ ~ 1.00MΩ	**$189.00**

Digi-Key® 0603 1% Chip Resistor Kits

RSM1H-ND	50 each of Values 10.0Ω ~ 97.6Ω	**$129.00**
RSM2H-ND	50 each of Values 100Ω ~ 976Ω	**$129.00**
RSM3H-ND	50 each of Values 1.00KΩ ~ 9.76KΩ	**$129.00**
RSM4H-ND	50 each of Values 10.0KΩ ~ 97.6KΩ	**$129.00**
RSM5H-ND	50 each of Values 100KΩ ~ 1.00MΩ	**$129.00**

Digi-Key® 0805 1% Chip Resistor Kits

RSM1CA-ND	50 each of Values 10.0Ω ~ 97.6Ω	**$119.95**
RSM1C-ND	200 each of Values 10.0Ω ~ 97.6Ω	**$299.00**
RSM2CA-ND	50 each of Values 100Ω ~ 976Ω	**$119.95**
RSM2C-ND	200 each of Values 100Ω ~ 976Ω	**$299.00**
RSM3CA-ND	50 each of Values 1.00KΩ ~ 9.76KΩ	**$119.95**
RSM3C-ND	200 each of Values 1.00KΩ ~ 9.76KΩ	**$299.00**
RSM4CA-ND	50 each of Values 10.0KΩ ~ 97.6KΩ	**$119.95**
RSM4C-ND	200 each of Values 10.0KΩ ~ 97.6KΩ	**$299.00**
RSM5CA-ND	50 each of Values 100KΩ ~ 1.00MΩ	**$119.95**
RSM5C-ND	200 each of Values 100KΩ ~ 1.00MΩ	**$299.00**

Digi-Key® 1206 1% Chip Resistor Kits

RSM1FA-ND	50 each of Values 10.0Ω ~ 97.6Ω	**$129.95**
RSM1F-ND	200 each of Values 10.0Ω ~ 97.6Ω	**$299.00**
RSM2FA-ND	50 each of Values 100Ω ~ 976Ω	**$129.95**
RSM2F-ND	200 each of Values 100Ω ~ 976Ω	**$299.00**
RSM3FA-ND	50 each of Values 1.00KΩ ~ 9.76KΩ	**$119.95**
RSM3F-ND	200 each of Values 1.00KΩ ~ 9.76KΩ	**$299.00**
RSM4FA-ND	50 each of Values 10.0KΩ ~ 97.6KΩ	**$129.95**
RSM4F-ND	200 each of Values 10.0KΩ ~ 97.6KΩ	**$299.00**
RSM5FA-ND	50 each of Values 100KΩ ~ 1.00MΩ	**$129.95**
RSM5F-ND	200 each of Values 100KΩ ~ 1.00MΩ	**$299.00**

Surface Mount Ultra Low Ohm Thick Film Chip Resistors — 1/10, 1/8, 1/4, 1/2 and 1 Watt

Rated Continuous Working Voltage (RCWV):
The rated voltage at each resistance should be calculated from the following equation:
$RCWV=\sqrt{P \times R}$
RCWV(V):P(W):R(Ω)
Maximum Overload Voltage = RCWV x 2.5

Panasonic Anti-Surge Thick Film Chip Resistors

Features:

- Operating Temperature: -55°C ~ 155°C
- Improved Anti-Surge characteristics compared to metal film resistors
- Metal glaze thick film resistive element and three layers of electrodes result in high reliability
- Suitable for both reflow soldering and flow soldering
- Thick film resistor with excellent Anti-Pulse characteristic and high rated power

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic Metal Film Thermosensitive Chip Resistors

Features:

Digi-Reel®

- Recommended for temperature correction circuits
- Temperature coefficient value 1000 x 10^{-6}/°C (ppm/°C) to 4700 x 10^{-6}/°C (ppm/°C)
- Quick response to temperature change
- Excellent linear resistance value change in wide temperature range (-40°C ~ 125°C)
- High reliability, high density placing
- Suitable for both reflow soldering and flow soldering

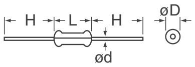
Panasonic 5 % Miniature Carbon Film Resistors

Features:

- High reliability using carbon film
- 52mm Axial taping style for automatic inserting machine
- 4 color code marking
- Uses UL 94V-0 approved coating for flame retardant type
- Approved under the ISO 9001 system
- Reference Standard: IEC 60115-2, JIS C 5201-2
- Miniaturized version



Type	Dimensions – mm L	D	d	H	Mass (mg)
1/4W, 5%	3.20	1.70	0.45	20 minimum	107

Panasonic 5% Metal Film Resistors

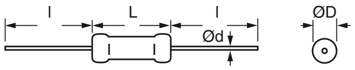
Now Available In Tape and Reel

Matsushita fixed metal film resistors feature small sized dimensions and have higher power rating at the same size as the conventional type.

Features:

Flame retardancy of the exclusively formulated inorganic insulative material exhibits an equivalent performance requirements of UL 94(VE-0) and when operated at a potential less than 16 times RCWV, Matsushita metal (oxide) film resistors never flame nor arc.

The coating and markings resist normal washing of solvents, such as Freon (TE, TMC, TF), trichloroethane.



Type	Maximum Working Voltage	Dimensions – mm L	l	D	d

5 and 10 Watt Wirewound and Metal Oxide Film Rectangular Resistors, 5%

Axial Lead Type • **Operating Temperature Range:** -55°C ~ 155°C

• Exceptionally small and sturdy; mechanically safe. Excellent electrical characteristics. • The materials used and the construction techniques ensure excellent flame resistance, arc resistance and moisture resistance as well as self-extinguishing capabilities. They will withstand the most rigorous loading test. • Applicable specifications: EIA RS-344 and EIA RC649.

Digi-Key® 5 Watt Resistor Assortment Kit

RS105-ND 0.30Ω ~ 0.91Ω – 5 each 60 Resistors **$23.95**

RS205-ND 1.0Ω ~ 9.1Ω – 4 each 96 Resistors **$32.95**

RS305-ND 10Ω ~ 91Ω – 4 each 96 Resistors.................... **$32.95**

RS405-ND 100Ω ~ 2.0KΩ – 3 each 96 Resistors.................... **$32.95**

Digi-Key® 10 Watt Resistor Assortment Kit

Two each of all 10 watt standard resistor values listed above. A total of 168 resistors.

RS110-ND.................... **$72.95**

Zero Ohm Jumper Wires

Applications: Generally they are used for the following reasons: • Inability to connect two points on a PC Board due to other circuit paths which must be crossed over. • An After-the-Fact design change that requires new point connections. • Circuit tuning by changing point connections.

Specifications: • Maximum Resistance: 0.004Ω on 1/6 watt, 0.003Ω on 1/4 watt • Typical Resistance: 0.002Ω on both • Lead Material: tin-plated copper • Body Material: electrical grade, high performance molding compound • Minimum Insulation Resistance – Dry: 10,000MΩ, Wet: 100MΩ • Minimum Dielectric Withstanding Voltage – Atmospheric: 500V RMS, Reduced: 325V RMS • Insulation Flammability: resistor-insulation is self extinguishing within 10 seconds after externally applied flame is removed • Current Rating: 25 Amps at 25°C, derating to 0 Amps at 150°C.

Digi-Key® 1/6 Watt Resistor Assortment

RSE200-ND 200 each of all standard values 5%, 1/6 watt carbon film resistors in the series 1.0Ω ~ 10MΩ (33,800 total pieces)...... **$409.00**

RS112-ND Set of 5 each of 73 standard 5%, 1/6 watt carbon film resistors in the series 1.0Ω, 1.2Ω, 1.5Ω, 1.8Ω, 2.2Ω, etc., through 1.0MΩ (365 total pieces).................... **$16.96**

RS212-ND Set of 5 each of the 72 standard 5%, 1/6 watt carbon film resistors in the series 1.1Ω, 1.3Ω, 1.6Ω, 2.0Ω, 2.4Ω, etc., through 910KΩ (360 total pieces) **$16.99**

Digi-Key® 1/4 Watt Resistor Assortment

RSQ200-ND 200 each of all standard values 5%, 1/4 watt carbon film resistors in the series 1.0Ω ~ 10MΩ (33,800 total pieces)...... **$239.00**

RS125-ND Set of 5 each of 73 standard 5%, 1/4 watt carbon film resistors in the series 1.0Ω, 1.2Ω, 1.5Ω, 1.8Ω, 2.2Ω, etc., through 1.0MΩ (365 total pieces).................... **$14.95**

RS225-ND Set of 5 each of the 72 standard 5%, 1/4 watt carbon film resistors in the series 1.1Ω, 1.3Ω, 1.6Ω, 2.0Ω, 2.4Ω, etc., through 910KΩ (360 total pieces) **$14.95**

Digi-Key® 1/2 Watt Resistor Assortment

RSH200-ND 200 each of all standard values 5%, 1/2 watt carbon film resistors in the series 1.0Ω ~ 10MΩ (33,800 total pieces)...... **$335.00**

RS150-ND Set of 5 each of 73 standard 5%, 1/2 watt carbon film resistors in the series 1.0Ω, 1.2Ω, 1.5Ω, 1.8Ω, 2.2Ω, etc., through 1.0MΩ (365 total pieces).................... **$16.95**

RS250-ND Set of 5 each of the 72 standard 5%, 1/2 watt carbon film resistors in the series 1.1Ω, 1.3Ω, 1.6Ω, 2.0Ω, 2.4Ω, etc., through 910KΩ (360 total pieces) **$16.95**

1% Metal Film Fixed Resistors 1/4 Watt

MFR Series

The MFR series Metal Film Resistors are manufactured using vacuum sputtering system to deposit multiple layers of mixed metals and passivative materials onto a carefully treated high grade ceramic substrate, the resistors are coated with layers of light-blue lacquer.

General Specifications:

- **Power Rating:** 1/4 Watt • **Maximum Working Voltage:** 250V • **Maximum Overload Voltage:** 500V • **Rated Ambient Temperature:** 70°C • **Temperature Cycling:** -65°C ~ 150°C • **Resistance Range:** 10.0Ω ~ 1.00MΩ • **Resistance Tolerance:** ±1%.

Electrical Specifications:

All measurements are taken at 25°C at 1KHz and 65% relative humidity, unless stated otherwise. • **Type:** MF-25 • **Style:** RN-55 • **Power Rating:** 1/4 Watt • **Resistance Tolerance:** ±1% • **Temperature Coefficient:** ±100PPM/°C

5% Metal Oxide Film Resistors

RSF Series

These Metal Oxide Resistors offer lower cost alternatives to Carbon Composition Resistors and General Purpose Metal Films. They can replace many low power General Purpose wirewound applications. These Metal Oxides meet overload tests in accordance with UL specification #1412 without producing a fire hazard. They withstand solvents in accordance with article Mil-Std-202E without producing mechanical or electrical damage.

Features: High surge/overload capability. Non-inductive design. Coating and marking resist Trichlorethelyne, Freon, and other cleaning agents. The RFS Series resistors are coated with layers of gray flame-proof lacquer.

CRT Series Thin Film Precision Chip Resistors

.1% 1/10W 0603, .1% 1/8W 0805 and 1206 Series

The CRT series of SMD precision chip resistors offer Absolute Tolerances and TCRs as low as 0.01% and 5ppm respectively. They are packaged in industry standard chip sizes ranging from 0402 to 1206 formats and are used in a wide range of circuits requiring very low noise and high accuracy.

Operating Temperature Range: -55 ~ 155°C
Temperature Coefficient: 5 ~ 50ppm/°C

CRA Series High Power Current Sense Chip Resistors

1% 3W 2512 Series

The CRA series of SMD power chip resistors are used for current measurement and circuit protection applications. It is rated to 3 Watts of power in an industry standard 2512 package with a resistance range of 10mΩ ~ 100mΩ and a TCR of ±75ppm.

CHF Series Power RF Chip Resistors/Terminators

5% 1206, 190104, 2010, 2525, 3523 and 3725 Series

The CHF RF Power Resistors are used in high power 50Ω terminations with excellent RF performance characteristics. Their typical function is in a “Fail Safe” mode to dissipate the transmission power in High Power RF Amplifiers. The CHF series is manufactured using thick film technology on special ceramics.

Applications: Radio/TV, telecommunications (WCDMA, CDMA, GSM), wireless technologies (Wi Max), radar and medical equipment

BOURNS® *NEW!* PWR163 Series Power Resistors

The PWR163 Series is a DPAK style surface mount power resistor. It has a very low inductance making it ideal for high frequency applications such as amplifiers for audio or wireless base stations. It has excellent pulse characteristics as well, allowing it to be used in current limiting or capacitor discharge circuits.

Features: • Smaller than a D2PAK package • Low inductance • Resistor electrically isolated from the backplate • High power rating • Compatible with lead free solder reflow temperatures

Operating Temperature Range: -55°C ~ 155°C

Dimensions in mm

PWR263 Series Power Resistors

The PWR263 Series is a TO263 DPAK style power resistor. Manufactured using thick film on alumina ceramic technology, it is used in current measurement, snubber, bleeder and discharge circuits.

Features: • D2PAK housing • Low inductance • Resistor electrically isolated from the backplate • High power rating **Operating Temperature Range:** -55°C ~ 155°C

NEW! PWR220T-20 Series Power Resistors

The PWR220T-20 Series is a TO-220 DPAK style power resistor. Manufactured using thick film on alumina ceramic technology, it is used in current measurement, snubber, bleeder and discharge circuits.

Features: • TO-220 housing • Low inductance • Resistor electrically isolated from the backplate • High power rating **Operating Temperature:** -55°C ~ 155°C

PWR2010 / 3014 / 4318 / 5322 Series

Surface Mount Wirewound Resistors

These surface mount wirewound resistors boast a high power density and excellent pulse power characteristics. They can be used in a wide range of applications where surge voltages or inrush currents are present.

Features: • Large terminals and optimized body shape for power dissipation • Excellent surge capabilities • Low TCR **Operating Temperature:** -55°C ~ 155°C

BOURNS® PWR4412-2S Series — Bare Metal Element Resistor

RoHS COMPLIANT

The PWR4412-2S Series is a through hole resistor designed for current shunt and current sensing applications such as power supplies of different kinds, motor drives and many other applications. The resistor is quite rugged, consisting of a special metal alloy welded to tinned copper leads. **Features:** • High current capability • Low inductance • Radial leads • Low ohmic **Electrical Specifications:** • Temperature Coefficient (TCR): -65°C<T<170°C ±20 PPM/°C • Operating Temperature: -40°C ~ 125°C • Inductance: 10nH

§ For complete part number, substitute the corresponding code from the Resistance Values chart for (Code).

Metal Plate Current Sensing Resistors – 73Mx Series

Features: • Very low resistance • Surface mount package • Suitable for current limiting, current detection, motor control, power supply and hard disk drives • High precision and excellent accuracy for current detection • Good electrical characteristics • Suitable for reflow solder process

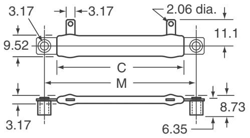
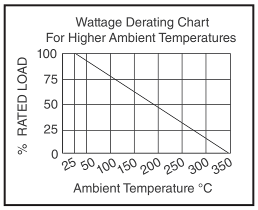
Miniature Oval Wirewound Resistors – 10, 20 Watt, 5, 10% FSOT Series

H.E.I. Miniature Oval Wirewound Resistors are ideally suited for applications where space is limited and the mounting surface can be utilized for heat dissipation purposes. The aluminum mounting brackets extend through the resistor core and equalize heat distribution while conducting heat directly into the mounting surface.

Specifications:
• Mounting Brackets: Constructed of aluminum and are an integral part of the resistor • Temperature Coefficient: ±400 PPM/°C 1Ω ~ 20Ω, ±260 PPM/°C 20Ω and above • Dielectric Withstanding Voltage: 500 VAC measured from terminals to mounting brackets • Overload: 10 X rated wattage for 5 seconds • Terminals: Hot tin dipped • Coating: Silicone • Core: Steatite ceramic





Series	Resistance Range (Ω)	Resistance Tolerance	Wattage	Dim. (mm) C	M	Digi-Key Part No.†	Price Each 1	10	50	100	Huntington Part No.

LO-OHM Power Resistors — 1, 3, 4, 5 Watt, 1%

Huntington Electric's Lo-Ohm resistors are ideal for current sensing applications in test instruments, power amplifiers, and switching and linear power supplies. These resistors are transfer-molded in high-temperature resin, providing a high power dissipation to size characteristic. This construction also provides superior thermal shock and moisture resistance. The encapsulation will not peel, flake or deteriorate with commonly used cleaning solvents, including Freon, and aqueous cleaning.

Specifications: • Resistance Tolerance: ±1% • Dielectric Strength: 1000 VAC (except 500 VAC for MTL-1A) • Insulation Resistance: 10,000 MΩ (dry) • Short Term Overload: 5 seconds @ 5 x rated power **Applications:** • Ideal for current sensing applications • Low inductance: Typically 7nH • Standard Resistance Tolerance to ±1% • Superior thermal shock and moisture resistance

HUNTINGTON ELECTRIC, INC.

Printed Circuit Board Mount Silicone Resistors – 7, 10, 20 Watt, 5%

Quick and easy installation with built-in standoffs to keep the printed circuit board cool, make this a superior resistor for application where the resistor is to be mounted directly onto a board.

Specifications: • Temperature Coefficient: 0 ±400 ppm/°C 1Ω, 0 ±260 ppm/°C 20Ω or above • Dielectric Withstanding Voltage: 500 VAC • Terminals: .025 x 0.35 pre-tinned rectangular pin (Recommend .078” diameter hole for mounting) • Coating: Silicone • Overload: 10 x rated power for 5 seconds • Core: Steatite ceramic

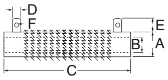
Edgewound Resistors – 300, 1000 Watt

HEI Edgewound Resistors are designed for applications demanding maximum power dissipation in minimum space. Edgewounds are constructed of special alloy resistance wire, crimped, and wound on edge. High quality ceramic cores are used with a coating of either vitreous enamel or silicone to provide heat sink for short term overloads and maximum dissipation.



Specifications:
• **Dielectric Withstanding Voltage:** Measured from terminals to brackets, 1000VAC • **Overload:** 10 X rated power for 5 seconds • **Tolerance:** ±10% • Wattage is based on 25°C free air rating

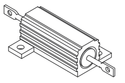
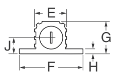
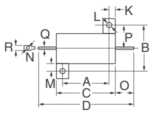
Aluminum Housed Chassis Mount Resistors – 5, 10, 25, 50 Watt, 1% (Precision Power Wirewound)







HEI’s high-power aluminum housed resistors use centerless ground ceramic cores for uniform heat distribution. Molded in a special high temperature material and mounted in an extruded aluminum finned housing, these designs provide maximum power dissipation and reliability. They have tinned copperweld leads for solderability and meet or exceed MIL-R-18546, including “N” characteristic, and MIL-R-39009. **Specifications:** • Power Rating: Based on full power operation at 25°C, and maximum hotspot 275°C • Mounting on proper heat sink as follows: For 5 and 10 Watt – use 4” x 6” x 2” x .040” (101.60 x 152.40 x 50.80 x 1.02mm) aluminum chassis; For 25 and 50 Watt – use 5” x 7” x 2” x .040” (127.00 x 177.80 x 50.80 x 1.02mm) aluminum chassis

Mounting	Requires use of a snap-on heat sink. A thermal compound should be properly applied.	Single screw mounting tab (with thermal compound recommended).	Single screw mounting tab (with thermal compound recommended).	2-Terminal is single screw mounted. 3-Terminal heat sink can be grounded through middle terminal	Single screw mounting	Heat sink dependent. Must be attached to a proper heat sink for full power rating. Maximum case temperature can not exceed 150°C. Optional recommended mounting bracket kit, 6200-ND

OHMITE TA Series Power Chip® Resistors — Thick Film on Alumina Substrate

5, 10 and 25 Watt

Ohmite Power Chip Resistors are thick film on alumina oxide substrates with copper plated silver conductors, Ruthenium oxide resistance material and a glass passivation layer. These resistors offer very low inductance (50nh measured at 1MHz) and outstanding power density (10W/in2). Repetitive transient capability is 5 times rated power as long as one second average dissipation remains equal to or less than the free air rating.

Features: • Wide resistance range • Low inductance • High power density • Easy to install • PC-mountable

Material: • Terminals: Solder Plated Phosphor Bronze • Coating: Glass

Electrical: • Resistance Tolerance: ±5% • Power Rating: Based on 25°C free air with linear derating to 0W at 350°C • Maximum Operating Voltage: 350VAC, 500VDC through glass 1,000VAC, 1,500VDC through substrate • Overload: Five times rated power, as long as the one second average dissipation does not exceed the wattage rating • DR: ±2%, 2000 hours • Derating: Linearly from 100% @ 25°C ~ 0% @ 350°C

Macrochip SMD Precision Thick Film Resistors

RoHS COMPLIANT

MacroChip resistors bring precision high voltage capabilities to the surface mount level. Designed with thick film on Alumina substrate technology. The planar package design is low profile for easy use with instrumentation, medical equipment, voltage regulators, and power supplies.

Features:
- Non-inductive design • Low voltage coefficient • Surface mount • Pd Ag terminations

Material:
- Resistor: Thick film on Alumina substrate

Electrical:
- Power at 25°C Ambient: 1.5W • Voltage Rating: 5.0KV • Operating Temperature: -55°C ~ 180°C

CS3 Series — Precision Current Sense Resistors

The resistor family line CS3 utilizes state-of-the-art technology to provide a highly reliable resistor with a non-inductive design. This makes the CS3 resistor ideal for many current monitoring and controls applications. **Features:** • Values beginning at 1mΩ • Non Inductive Design • Four terminal Kelvin connection • 100% QC measurement **Specifications: Material:** • Terminal Material: Kelvin Terminals; silver plated and tinned • Encapsulation: Polyester over resistance element **Electrical:** • Resistance Tolerances: 1% • Temperature Coefficient: TC referenced to 25°C, ΔR taken at 15°C and 105°C, 60ppm/°C • Power Rating: 3W at 70°C maximum 40Amp permanent

OHMITE Four Terminal High Precision Current Sense Resistors

Current Sense Resistors enable the measurement of current flow in a circuit by monitoring a voltage drop across a precisely calibrated resistance. The LVK chip features four terminals, also know as a "Kelvin" configuration. This configuration enables current to be applied through two opposite terminals and a sensing voltage to be measured across the other two terminals, eliminating the resistance and temperature coefficient of the terminals for a more accurate current measurement. Isolating the voltage and current terminals (see schematic) facilitates a very accurate current measurement. Ohmite's proprietary technology offers an excellent Temperature Coefficient of Resistance (TCR) even for very low resistance values. The resistive element consists of a durable, anti-corrosive reliable performance with the ability to withstand harsh environments.

FEATURES: • Working Temperature Range: -55°C ~ 200°C

SPECIFICATIONS: • Operating Temperature Range: -40°C ~ 125°C

FCSL Series – Metal Foil Current Sense

FCS incorporates proven metal foil technology to produce the ultimate in a current sense resistor. FCS features the effective combination of very low and stable TCRs (Temp. Coefficient of Resistance) available in a wide selection of very low ohmic values. Power ratings up to 4W make FCS the ideal choice for current sensing applications. **Features:** • Foil Construction ensures stable TCR • Designed for automatic insertion • Industry standard sizes • High heat resistant use • Low heat electromotive use • Max. Temp. for Rated Power: 70°C • Operating Temp. Range: -55°C ~ 155°C • Rated Voltage: $\sqrt{\text{(Rated power x Resistance value)}}$V • Rush Current: Rated current 10 msec. ON, 60 sec OFF, 10 cycles, Max. ΔR: ±(1.0% +0.0005Ω)

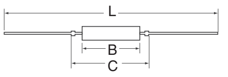
60 Series – Metal Element Current Sensing Resistors



These non-inductive, 3-piece welded element resistors offer a reliable low-cost alternative to conventional resistors.

Features: • Low inductance • Low cost • Wirewound performance • Flameproof

Material: • Resistor: Nichrome Resistive element • Terminals: Copper clad steel or copper depending on style

Derating: • Linearly from 100% @ 25°C ~ 0% @ 275°C

Electrical: • Power rating: Based on 25°C ambient • Overload: 5x rated power for 5 seconds • Inductance: <10nh • To calculate maximum amps use the formula $\sqrt{P/R}$

High Voltage Flip Chip Film Resistors

High Voltage Flip Chip Series incorporates high accuracy screen printing technology to achieve high voltage capability in a stable flip chip SMD chip resistor package. The HVF Series offers unmatched performance in comparison to standard chip resistors. Its unique design provides lower voltage and temperature coefficients, less noise, tighter tolerances, better stability, higher resistance values and high voltage ratings. HVF is available in convenient 1206 and 2512 footprints.

Features: • Working Temperature Range: -55°C ~ 200°C
Specifications: • Temperature Coefficient: ±100ppm standard
Performance Data: • Overload: 1,5 x Pnom, 5 seconds (do not exceed maximum voltage) • Load Life: 1000 hours at rated power (IEC 115-1)

TL88 Series – Heat Sinkable Thick Film Power Resistors

The TL88 Series add heat sinkable options to the thick film resistor family. The resistor element is packaged with plastic insulators and quick-connect terminals in a symmetrical aluminum profile for easy heat sink mounting. Self-insulating package design increases voltage withstanding characteristics when compared to traditional aluminum housings. The in-line mounting profile makes the TL88 Series easily adaptable to most heat sink systems. Thermal compound is always recommended when heat sinking.

Features: • Very low inductance • In-Line Mounting Profile • 1/4" Quick connect terminals • Low profile design

Applications: • Semiconductor Balancing • Frequency Converters • In-Rush Current Limiter • Snubber • Bleeder Resistor • Power Switching • Voltage Dividers

Material Specifications: • Resistive Element: Thick film on alumina • Housing: Aluminum • Insulators: Glass reinforced high temperature Valox® • Terminals: Tinned brass

Electrical Specifications: • Tolerance: ± 10% Standard • Temperature Coefficient: ±250PPM • Working Voltage: 1200VAC • Temperature Limits: -40°C ~ 125°C • Air Distance, Terminal to Ground: 7mm • Maximum Voltage Between Terminal: 2500V • Inductance: 50-100nH

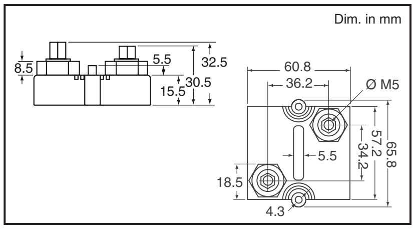
TAP600 Heat Sinkable Planar Resistors – 600 Watt



TAP600 delivers 600 watts of reliable power to a variety of power conditioning, power transmission, and power control applications.

Features: • Dielectric Strength: Up to 12KV • Special Design for Low Inductive and Capacitance Values • Easy termination to contacts with M5 screws • Calibrated Mounting simplifies assembly **Electrical Specifications:** • Resistance Tolerance: ±10% Standard • Maximum Operating Voltage: 5000VDC • Power Rating: 600W at 70°C heat sink temperature • Temperature Coefficient: ±150ppm/°C • Operating Temperature Range: -55°C ~ 150°C • Electric Strength Voltage: Up to 12000Vrms, 50HZ, 1 minute @ 500V • Insulation Resistance: 10GΩ minimum at 500V • Air Distance: 14mm minimum • Inductance: ≤ 80nH

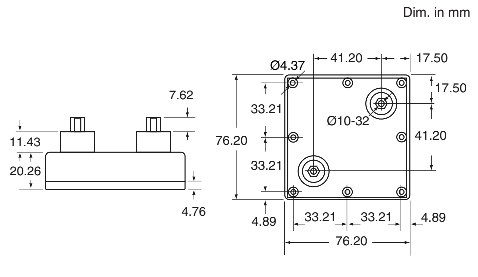
OHMITE® TAP1000 Heat Sinkable Planar Resistors – 1000 Watt

RoHS COMPLIANT



TAP1000 Series resistors deliver 1000 watts of continuous power with thick film on alumina substrate technology. Up to 30% smaller, the TAP1000 is capable of 2 to 4 times the power dissipation of traditional heat sinkable resistor technologies. Designed for use with liquid cooled heat sinks, TAP1000 resistors are capable of dissipating 1000 watts of continuous power when properly mounted (based on 70°C base temperature). Offering the highest power available in a heat sinkable package, the TAP1000 is well suited for power conditioning, power distribution, power conversion and power control applications. Constructed of durable, lightweight materials, the TAP1000 package is easy to design and mount.

Features: • Dissipates 1000 Watts @ 70°C Mounting Plate Temperature • High Energy Rating • Low Inductance • Resistor Element Electrically Isolated • High Dielectric Strength • Small Footprint **Applications:** • Power semiconductor balancing • Motor control • Inrush current limiting **Material Specifications:** Resistor element - thick film on alumina substrate Electrical Specifications: • Resistance Tolerance: ±10% Standard • Maximum Operating Voltage: 2000VDC • Power Rating: 1000W @70°C • Temperature Coefficient: ±250ppm/°C • Dielectric Strength: 6KV • Operating Temperature Range: -55°C ~ 150°C **Case Specifications**: • Terminal Screws (#10 - 32), Maximum Contacts Torque: 10 in-lb. • Mounting Screws (#8 - 32), Maximum Mounting Torque: 15 in-lb.

OD, OF and OA Series — Little Demon® Carbon Composition Molded Resistors

Little Demons are small, reliable carbon composition resistors with exceptional strength. They are made tough by a molding process that combines the leads, insulation and resistive element into an integrated unit. Along with their small size, Little Demons perform with low noise, dissipate heat rapidly and offer high temperature stability. Color codes are readable even after prolonged use, thanks to a very durable coating that resists abrasions and chipping normally associated with automatic insertion equipment.

Features: • Molded insulation for high dielectric strength • Rugged construction • High surge capabilities • Comparable to "Mil" RC07, RC20, and RC32 types **Material:** • Terminals: Solder-coated copper lead • Body: Molded Phenolic **Electrical:** • Derating: Linearly from 100% @ 70°C ~ 0% @ 130°C

High Voltage Resistors — "Super-Mox" Precision Thick Film Axial Resistors

RoHS COMPLIANT

High-voltage Super-Mox resistors have been developed to meet the precision temperature stability requirements of high-accuracy and high-voltage systems, combining proprietary non-inductive resistance system and design to achieve low temperature coefficient, low voltage coefficients, high stability and increased high operating voltages. Super-Mox low-TC precision high-voltage resistors are designed to meet the demanding requirements of high voltage power supplies, electron microscopes, X-ray systems, high resolution CRT displays and geophysical instruments.

Material Specifications:

- Encapsulation: Silicone Conformal Coating
- Terminal Material: Gold Plated
- Core Material: Al2O3 (96%)
- Resistor Material: Ruthenium Oxide

Electrical Specifications:

- Operating Temperature: -55° ~ 225°C
- Dielectric Strength: >1,000 Volt 25°C 75% relative humidity

RoHS COMPLIANT

Specifications:
Material: • Ceramic Core: CeramTec Rubalit® 708 96% alumina • End Caps: Stainless steel, precision formed • Terminals: Copper wire, 100% Sn (lead free) coated • ISAOHM alloy resistance wire TC ±20ppm/°C • Encapsulation: SUMICON 1100/1200 Epoxy molding compound for IC encapsulation **Electrical:** • Tolerance: ±1.0% **Features:** • WN Series, Aryton Perry winding Non-Inductive • Inductance <nH at 1MHz test

90 Series — Vitreous Enamel Molded Axial Terminal Wirewound Resistors, 5% Tolerance

Specifications:
Material: • Coating: Molded vitreous enamel • Core: Ceramic
Electrical: • Power Rating: Based on 25°C free air rating • Temperature Coefficient: 1 ~ 9.99Ω: ±100ppm/°C; 10Ω and over: ±30ppm/°C

OHMITE WFH Series — Aluminum Housed Power Wirewound Resistors

Features:
• Ohmite's new flat core winding technology allows for wirewound heat sinkable resistors affording a very low profile and superior thermal transfer characteristics when compared to conventional aluminum housed wirewound resistors. • Close mounting of heat sensitive components is possible due to only a slight rise of the temperature on the aluminum profile. • No heat sink compound is required because of large mounting surface.

Specifications:
• Dielectric Strength: 2500VAC peak • Working Voltage: 1200VAC • Insulation: Silicone Rubber & Mica. The Silicone is UL-recognized (UL 94 HB) to a working temperature of 220°C. Temperatures of up to 300°C can be endured for shorter periods, however this may cause an expansion of the silicone rubber with a possibility of reducing the dielectric strength.
Note: *Please see data sheet for heat sink recommendations.*

89 Series — Aluminum Housed Axial Terminal Wirewound Resistors

The 89 Series are high performance axial terminal resistors. They are better suited to withstand vibration, shock and harsh environmental conditions than standard axial resistors. The 89 Series are aluminum housed to maintain high stability during operation and to permit secure mounting to chassis surfaces. The housing also provides heat-sinking capabilities.

Slim-Mox Series — Precision Thick Film Planar Resistors

Features: • High dielectric and low outgassing epoxy coating • Low resistor noise • Non-inductive
Applications • HV power supplies • Medical instrumentation • Current pulse limiters • Ionization chambers
Material: • Resistor: Thick film on Alumina
Electrical: • Operating Temperature: -55°C ~ 110°C

Ceramic Housed Radial Terminal Power Resistors

The TWW/TWM Series radial terminal power resistors offer significant board space savings over axial products. Generated heat is also kept away from the circuit board. They are recommended for commercial applications requiring low cost.

AW, AX, AY Series — Ceramic Composition Resistors

The "A" Series of non-inductive, ceramic composite resistors are designed for a variety of applications where high energy handling capabilities are crucial. Designed for use in motor drives, UPS and other power conversion systems, these resistors are ideal for any application which is subject to surges, high peak power, impulse energy or inrush current limiting. **Material Specifications:** • Resistance Element: Bulk Ceramic • Terminals: Solder coated radial leads (axial lead version available upon request) • Coating: UL94V0, solvent resistant epoxy **Electrical Specifications:** • Tolerance: ±10% Standard • Derating: Derates linearly from 100% @ 50°C ~ 0% @ 150°C • Temperature Rise: 100°C @ 100% rated power, 50°C ambient

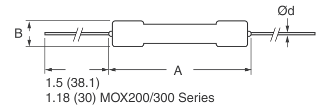
Metal Oxide / Epoxy Coated Resistors — "Mini-Mox" Precision Thick Film Axial Resistors



Applications:

• Avionics • Medical Electronics • High Gain Feedback Applications • Current Pulse Limiters • Vacuum and Space Application

Material:

• Resistor: Metal Oxide • Coating: Epoxy • Core: Alumina • Terminals: Solder-Coated Axial Lead

Series	Voltage Rating	Dimensions — Inches (mm) A	B	ød
MOX-200	500V	0.26 (6.5)	0.09 (2.2)	0.02 (0.6)

250 Series Vitreous Enamel Power Resistors — 30, 40 and 55 Watt

When limited space is a consideration, choose Ohmite's "thin" stackable 250 Type resistors .These oval-shaped ceramic-core resistors feature a low profile to permit installation in spaces with minimal height. They are also equipped with integral mounting brackets so they can be fastened to a chassis and stacked in locations with limited surface area.

Material:
- Coating: Lead free vitreous enamel
- Core: Ceramic
- Derating: Linearly from 100% @ 15°C ~ 0% @ 350°C

Electrical:
- Tolerance: ±5%
- Overload: 5 times rated wattage for 5 seconds
- Dielectric withstanding voltage: 1000VAC (measured from lug to mounting bracket)

High Voltage Resistor — HVR: A multi layer metal film is deposited on a high-grade ceramic body. After a helical groove has been cut in the resistive layer, tinned electrolytic copper wires are welded to the end caps. The resistors are coated with a blue lacquer, which provides electrical, mechanical and climactic protection. The encapsulation is resistant to all cleaning solvents in accordance with "MIL-STD 202, method 215" and "IEC 60068-2-45."

Features: • Metal film technology • High pulse loading capability

Specifications: • Limiting Voltage: 1,600VDC (HVR25), 3,500VDC (HVR37), 10,000VDC (HVR68 & VR68) • Temperature Coefficient: ±200ppm/°C

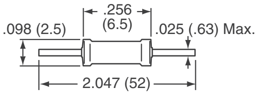
SFR25 Type 1% Metal Film Resistors — .40 Watt 5043ED Series



A homogeneous film of metal alloy is deposited on a high grade ceramic body. After a helical groove has been cut in the resistive layer, tinned connecting wires of electrolytic copper are welded to the end-caps. The resistors are coated with non-flammable light green, lacquer, which provides electrical, mechanical and climactic protection. The encapsulation is resistant to all cleaning solvents in accordance with “MIL-STD-202E, Method 215” and “IEC 60068-2-45”.

CHARACTERISTICS:

- **Resistance Tolerance:** ±1%
- **Temperature Coefficient:** R≤1MΩ = ±100 ppm/°C, R>1MΩ = ±250ppm/°C
- **Absolute Maximum Dissipation at T_{AMB} = 70°C:** 0.40W
- **Thermal Resistance, R_{TH}:** 200K/W
- **Maximum Continuous Operating Voltage:** 250V (DC or RMS)
- **Noise R ≤ 1 MΩ:** Maximum 0.1 μV/V
- **Operating Temperature Range:** -55°C ~ 155°C

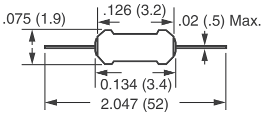
SFR16S Type 1% Metal Film Resistors — .50 Watt 5033ED Series



A homogeneous film of metal alloy is deposited on a high grade ceramic body. After a helical groove has been cut in the resistive layer, tinned connecting wires of electrolytic copper are welded to the end-caps. The resistors are coated with non-flammable light blue lacquer, which provides electrical, mechanical and climactic protection. The encapsulation is resistant to all cleaning solvents in accordance with “MIL-STD-202E, Method 215” and “IEC 60068-2-45”.

CHARACTERISTICS:
• **Resistance Tolerance:** ±1% • **Temperature Coefficient:** R≤ 200KΩ = ±100ppm/°C, R> 200KΩ = ±250ppm/°C • **Absolute Maximum Dissipation at T_{AMB} = 70°C:** 0.50W • **Thermal Resistance, R_{TH}:** 170K/W • **Maximum Continuous Operating Voltage:** 200V (DC or RMS) • **Operating Temperature Range:** -55°C ~ 155°C

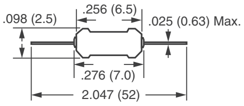
MRS25 Type 1% Metal Film Resistors — .60 Watt 5053MC Series



A homogeneous film of metal alloy is deposited on a high grade ceramic body. After a helical groove has been cut in the resistive layer, tinned connecting wires of electrolytic copper are welded to the end-caps. The resistors are coated with a green, non-flammable lacquer, which provides electrical, mechanical and climactic protection. The encapsulation is resistant to all cleaning solvents in accordance with “MIL-STD-202E, Method 215” and “IEC 60068-2-45”.

CHARACTERISTICS:
• **Resistance Tolerance:** ±1% • **Temperature Coefficient:** ±50 ppm/°C • **Absolute Maximum Dissipation at T_{AMB} = 70°C:** 0.60W • **Thermal Resistance, R_{TH}:** 150K/W • **Maximum Continuous Operating Voltage:** 350V (DC or RMS) • **Operating Temperature Range:** -55°C ~ 155°C

PR01 Type 5% Power Metal Film Resistors — 1 Watt 5073NW Series

A homogeneous film of metal alloy is deposited on a high grade ceramic body. After a helical groove has been cut in the resistive layer, tinned connecting wires of electrolytic copper are welded to the end-caps. The resistors are coated with a red, non-flammable lacquer, which provides electrical, mechanical and climatic protection. The encapsulation is resistant to all cleaning solvents in accordance with "MIL-STD-202E, Method 215" and "IEC 60068-2-45".

Characteristics:

- **Resistance Tolerance:** ±5%
- **Temperature Coefficient:** ±250 ppm/°C
- **Absolute Maximum Dissipation at T_{AMB} = 70°C:** 1.0W
- **Thermal Resistance, R_{TH}:** 135K/W
- **Maximum Continuous Operating Voltage:** 350V (DC or RMS)
- **Operating Temperature Range:** -55°C ~ 155°C

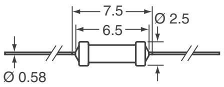
NFR25/NFR25H Type 5% Metal Film Fusible Resistors — 0.33 and 0.5 Watt

5063F and 5065F Series

RoHS Compliant Parts Available

The resistors are coated with a grey, flame retardant lacquer which provides electrical, mechanical and climatic protection. The encapsulation is resistant to all cleaning solvents in accordance with "MIL-STD-202E, Method 215" and "IEC 60068-2-45".



Features:

- Fusible resistors
- Defined interruption behavior (fusing time)
- Nonflammable lacquer
- High stability, reliability and uniformity characteristics
- Suitable for protecting circuit boards and designs

Characteristics:

- **Resistance Tolerance:** ±5%
- **Maximum Dissipation at T_{AMB} = 70°C:** NFR25: 0.33W; NFR25H: 0.5W
- **Maximum Permissible Voltage:** NFR25: 250V; NFR25H: 350V
- **Operating Temperature Range:** -55°C ~ 155°C

1% and 5% Cemented Wirewound Resistors

RoHS Compliant Parts Available

The resistor element is a resistive wire which is wound in a single layer on a ceramic rod. Metal caps are pressed over the ends of the rod. The ends of the resistance wire and the leads are connected to the caps by welding. Tinned copper-clad iron leads with poor heat conductivity are employed permitting the use of relatively short leads to obtain stable mounting without overheating the solder joint. The resistor is coated with a green silicon cement which is not resistant to aggressive fluxes. The coating is non-flammable, will not drip even at high overloads and is resistant to most commonly used cleaning solvents, in accordance with MIL-STD-202E, method 215 and IEC 60068-2-45.

Characteristics:

PAC: • Resistance Tolerance: ±1% • Temperature Coefficient: ±100ppm/°C • Rated Dissipation at TAMB=25°C: 1W, 3W, 5W • Operating Temperature Range: -55°C ~ 200°C • Maximum Permissive Body Temperature: 275°C

AC: • Resistance Tolerance: ±5% • Temperature Coefficient: <10Ω +600ppm/°C, >10Ω-80/+140ppm/°C • Rated Dissipation at TAMB=25°C: 1W, 3W, 5W, 7W • Operating Temperature Range: -40°C ~ 200°C • Maximum Permissive Body Temperature: 350°C

NEW! Thin Film Back-Contact Resistors

The Back Contact Resistor (BCR) series single-value chip is one of the smallest chips available. The BCR requires only one wire bond thus saving hybrid space. **Features:** • Wire bondable • Small size 0.020 inches square • Oxidized silicon substrate for good power dissipation • Resistor material: Tantalum nitride, self-passivating • Moisture resistant

VISHAY. Dale WSL Power Metal Strip® SMT Resistors

Features: • Ideal for all types of current sensing, voltage division and pulse applications including switching and linear power supplies, instruments and power amplifiers • All welded construction • Solid metal iron-chrome (nickel chrome on WSL3921 and WSL5931) or manganese-copper alloy resistive element with low TCR (<20 ppm/°C) • Very low inductance 0.5nH ~ 5nH • Excellent frequency response to 50MHz • Low thermal EMF (<3µV/°C

Specifications: • Operating Temperature Range: -65°C ~ 170°C • Thermal Shock: -55°C ~ 150°C, 1000 cycles, 15 minutes at each extreme • Load Life: 1000 hours at 70°C, 1.5 hours "ON", 0.5 hours "OFF" • Short Time Overload: 5X Rated Power for 5 Seconds
